## WPA Payroll Here Trifle Over Quota

For the first time since reductions in WPA payrolls were ordered, last March, district three failed last week to meet its quota, according to D. G. Metcalf, district labor inventory manager. Metcalf said the district had 1873 men and women on the payroll June 15, 73 more than provided for in the quota. This quota, however, will be met by the end of the month, he predicted.

The present number of WPA workers in this district, consisting of eight counties, is approximately one-half the number at work during the midwinter peak. Weather unfavorable to the opening up of seasonal agricultural work was blamed by Metcalf for the quota overplus.

## Why Suffer Torture with Bad Feet?

One of the greatest needs of our modern day life is effective foot correction. Our feet are the foundation of the body. When the foundation crumbles the superstructure ceases to function properly, involving in a greater or less degree, (adversely) the entire body structure.

WHEN YOUR FEET ARE DOWN you may be subject to one or more of the conditions that gnaw on the vitality of the victim. Corns (hard or soft) calluses, bunions, leg ache, back ache, puffed ankles, nerves, and other foot conditions sap the vitality of the many sufferers. This form of discomfort is reflected in the face of the victim by means of lines that replace the beauty of a once beautiful skin.

CHILDREN HAVE BAD FEET—In our work we find many youngsters with bad feet. We urge parents to check up on the kiddies' feet to assure them a good start in life in that respect for it is important to their development. If you cannot tell us help you, without cost.

POSTURE IMPORTANT—The proper posture of the body hinges on the condition of the feet. When the posture is poor the body alignment is also bad and lacking in grace. This condition also results in more or less shifting of the organs of the body, in an effort to compensate for lack of graceful balance of the entire body structure.

Many of the drooping shoulders of youngsters, who seem to be hollow chested, is the result of broken down feet. The trail of bad feet is strewn with all sorts of physical deficiencies. If you have bad feet, we will be glad to correct them. If you have questions to ask we will answer them without obligation. The field for this sort of service to humanity is limitless, with no reasonable reason for competition, for broken feet are on every hand.

HAVE YOUR FEET FIXED—Find some one that will stay by you until the job is finished to your satisfaction and comfort. For the sake of health and comfort have your feet fixed.
