New Projects to Be Need For Fall

New WPA projects, particularly in towns and cities, are going to be badly needed next fall, J. E. Smith, district WPA director, declared here yesterday. He said many applications were coming in for projects but few were in cities.

City projects, Smith said, will obviate the present necessity of sending works program employees many miles by truck to reach the various jobs. During the past winter, for example, an average of 100 men-daily were sent by truck to work on the Independence-Akeny road, Smith said.

Smith suggested street drainage, grading and graveling as good city projects which would cost the sponsors little money. Other projects were proposed such as park and playground improvements.

The Salem school board is the only local unit which has availed itself to any marked extent of the works program, Smith said.

Grenfell and an automobile driven by Don Walker, route one, Amity, failed to make a turn and upset. Walker and two others were not hurt.

Several projects were picketed. No disturbance was reported. The strike was called by the Workers' Alliance.

Strikers said they wanted 60 cents an hour for 92 hours a month instead of the present 50 cents for 110 hours. Engineer Schwartz, however, said delegates demanded 75 cents an hour.
