European Grain Prices Firm, Chicago Market Trend Upward

Corn Estimate **Found Bearish**

But Comes After Close of Trading; 42 Million Increase Shown

CHICAGO, Sept. 10.-(AP)-Influenced by establishment of a full shipping difference at Liverpool over Winnipeg, wheat values tended upward late today, and the corn market also rallied.

Trade interest centered largely on guesses relative to the United States government crop report, which came after the close of business, and proved to be a surprise as to the country's 1936 expected yield of corn, showing an increase of 42,000,000 bushels over the average of recent private estimates.

Wheat closed firm at the same as yesterday's finish to 1/2 cent higher, Sept. 111 1/2-%, Dec. 110 1/2-%, May 109 1/4-%; corn % off to 1% up. Sept. 111%-1/2. Dec. 94%-%, May 9614-%; oats unchanged to 1/8 lower, Dec. 42 1/8-1/4, and rye 1/4-1/8 advanced, Dec. 80 %. Results in provisions were unchanged to 15 cents

Winnipeg Trade Active Today's price rallies in wheat, and in corn as well, were promoted not only by late firmness of the Liverpool wheat market, but also by Winnipeg reports of a good demand for all grades of cash wheat.

The widest price fluctuation of grains today was in September corn contracts which touched a low of 109 % and a high of 111 % with the finish near the top. Rye and oats chiefly followed wheat and corn in a narrow range. Provisions reflected late downturns of hog values.

Canada's Crop of Wheat Far Short

OTTAWA, Sept. 10 .- (AP)-The wheat production of Canada for 1936 is estimated at 232,973,000 bushels in a crop report issued today by the dominion bureau of statistics. Of this amount 220,-903,000 bushels is spring wheat. and 12,070,000 bushels fall wheat. The spring wheat crop of the prairie provinces is estimated at 216,000,000 bushels. The total wheat crop of Can-

ada last year was 277,399,000 bushels, of which 264,738,000 bushels was spring wheat and 12,601,000 bushels fall wheat. The three prairie provinces last year produced 259,500,000 bushels of wheat.

Stocks Taking **Upward Trend**

Advance Limited to Steel, Amusements and Few Specialty Issues

NEW YORK, Sept. 10 .- (AP)-Stocks were inclined to tilt upward in today's market, but buying ardor was confined almost exclusively to the steels, amusements and selected specialties.

Trading sentiment appeared to be buoyed, but the immediate future was far from clear and many of the commission house customers were not adverse to cashing in some of their profits

The Associated Press average of 60 issues was unchanged at 68.9. Transfers totaled 1,545,250 against 1,571,870 in the previous

Of the 20 most active stocks of the day, 16 finished behind plus signs, and four were off small fractions. The steel group took the lead

an optimistic note. Movie Prices Figure Recent boosts in moving picure theatre admission charges, together with reports of capacity attendance over the holiday, aroused hopes of sharply increased earnings for some of the

companies in this line. While copper shares did virtually nothing, an increase in prices of copper and brass products brought life to some of the fabricating issues.

The motors and utilities were backward throughout. The holi- ess. day cut down electric power consumption and automobile output was off on account of the changeover to 1937 models.

Staehely Farm in New Era Vicinity Is Sample of Water Benefit

Scores of farmers, business men, professional men and educators and public officials, taking part in the sixth annual Wilrecently, saw to their satisfaction that irrigation is the way to increased wealth in the valley. As an outstanding example of what irrigation will do, they were

prothers near New Era in Clackmas county. Here there is installed a 10forsepower motor connected directly to a double suction pump which delivers 350 gallons of water per minute on the 85-foot lift, The pump operates at 1750 revolutions per minute.

This installation has made it possible to take cows from the barn and dry feed in the summer and place them on irrigated pas-

Power Cost Low The significant thing is that the Staehely brothers have doubled their milk production, at a cost of about 50 cents a month for electricity to pump the water.

An abundant, cheap pasture during the summer months is necessary to the success of the dairy farmer to save the high cost of feeding hay, ensilage and grain. ary pasture dries out quickly so that the most practicable way to keep it in condition to support fact and are to be congratulated on the vigor and foresight they are showing to combat high feeding costs by utilizing irrigated pasture, even though they do have to contend with what some persons would term a high pumping

Eggs Weak on Market, Contrary to New Rise

PORTLAND, Sept. 10.-(AP)-A rise of 1c quoted on large standard eggs on the exchange was not confirmed on the open market today where standards were weak instead of firm and higher. The same applied to the advance of 1c for medium extras.

Recent withdrawals from storage have been quite liberal.
