Drive Safely on MOHAWK TIRES

At Fred Meyer Thrifty Prices

Mohawk Tires are scientifically designed for modern conditions, with the world's finest, safest tread. Mohawk engineers have pioneered the way for motorists to save millions of dollars in tire cost, with their newly developed natural road contour tread. The natural road contour is the curvature from shoulder to shoulder, any tire will assume after several thousand miles in service. Round treads wear first in center, flat treads first on the shoulders, each design thereby causing fast, uneven tread wear. The new Mohawk with natural road contour tread eliminates this fault, because every square inch of tread surface takes its share of wear, the minute the tire is put into service. Longer life, greater economy, greater safety will result from the use of Mohawks on your car—investigate!

100% PURE PENN. OIL

A straight oil, NOT a blend, which means every drop of oil is identical, no component parts to break down in your motor. That's why our 100% Pure Penn stands up! 25c can deposit.

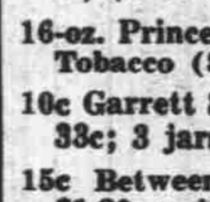

5 gals. **\$2.95**
