Six Reasons That Urge a "NO" vote on State Power Bill

- (1) This bill puts the State of Oregon head over heels into the electric power business, sets up a commission of three men, without bond and with no required qualifications, to run this gigantic system.
- (2) \$18,000,000 of tax-supported bonds can be sold, when authorized, to build this state-wide power system. By simple process of amending the bill \$54,000,000 of tax-supported bonds may later be authorized and sold. These bonds must be paid by taxes if the system is unsuccessful.
- (3) How can a complete state power system be built for \$18,000,000 when the State Planning Board advisory committee on power estimated cost of TRANSMISSION SYSTEM ONLY to be \$29,670,000? (See committee report to governor of Oregon, Dec. 20, 1935, page 18.)
- (4) This bill contains no promise or assurance of lower electric rates; rates may vary and be juggled at the commission's whim.
- (5) Cities, counties, and the state will lose millions of taxes now paid by existing utilities, thus forcing higher taxes on remaining property.
- (6) This 3-man power commission can buy any property or engage in any business "deemed necessary or convenient." Here is opportunity for vast political activity under control of a NEW STATE COMMISSION. (See Section 9, subsection 10).
