Stocks at Peak Since April, 1931, as Steels Lead Advance

Business Sees Bright Future

Mild Selling Flurries Put Only Temporary Stop to Upward Trend

NEW YORK, Oct. 17-(AP)-Apparently inspired by further op-timistic business sentiment, the stock market today posted another new high record for the past 5 1/2

Led by steels, coppers, amuse-ments and numerous specialties, the list forged ahead for gains of fractions to around 2 points.

Mild selling flurries punctuated the advance, but these only slowed the upward pace temporarily. The majority of leaders finished near their tops of the session.

The Associated Press average of 60 stocks moved up .3 of a point to 71.7, a peak level since April 21, 1931. Transfers totalled 1,152,860 shares against 971,060 last Saturday.

Steels again responded to cheering implications seen in the wide expansion plans of the major corporation in this industry.

Prominent stocks on the up. side included U. S. Steel at 78% Bethlehem 75 1/2 Kennecott 56 %, Westinghouse 153, General Motors 73, J. I. Case 168, Deere 96, and International Harvester 90 1/4.

total figures show a record registration, the vote in Oregon November 3 will not show a high percentage. On the reverse it will show a smaller voting percentage. It is beyond human conception that there are nearly 600,-000 bona fide voters in the state. Consider the population.

With that explanation of the record registered vote, there is plenty to say for the campaign for registration. Undoubtedly the past few months has seen a concentrated campaign for people to register-both republicna and democratic-never before witnessed.

All counties in the state showed an increased democratic registrawhile ten reported a loss in the republican vote. All but a few reported larger totals. It will remain to be seen whether the vote at the polls reflects the same as the registration, particularly considering the large "dead" list.
