The Intelligent Voter

great deal is heard every year about the intelligent voter. The ignorant voter, it is universally conceded, is the person who persists in voting for the candidate you oppose.

A fairly long observation of political behavior has made this writer very uncertain about the "intelligent voter." This uncertainty is increased by consideration of the poll at Williamette university where 190 students voted for Landon and ficient." 187 for Roosevelt. There were 86 for Thomas and four for William Lemke.

Here are students not of equal intelligence to be sure, but about as homogeneous a group as could be assembled. Then how shall we appraise the "intelligence" of the persons who voted for the various candidates? Was the IQ of those voting for Landon higher than those voting for Roosevelt; or does the IQ run in inverse ratio, with the four for Lemke highest, the 86 for Thomas next, and on down the line?

The balloting was secret of course, but the probability is that the gradations of "intelligence" of the students were quite similar for each group, except where the number, as four for Lemke, was insufficient for reliable comparison.

So we come down to this: that selections in voting are not determined by "intelligence" so much as by feeling. Students feel the pull of family tradition. Or they feel the attraction of personality. Or they react to personal interest of themselves or their families. In other words voting is quite as much an emotional response as it is an intellectual process.

Which is quite as it should be; because the human animal government legislature. is governed by his feelings as well as by his reasoning powers. We cannot free ourselves from our emotional responses. Most every voter, if he looks back over his voting record, will realize that his voting has been determined by other considerations than cold, intellectual calculation. The danger however, is for voting to be almost exclusively emotional, with a minimum of honest study. It is among voters with no ballast of intelligence that the demagogue wields his influence. Fortun-ately, in the past there has been a sufficient diffusion of intelligence that few genuine demagogues have risen to nation-

In the matter of voting on measures the reactions are very different. There the people make a genuine effort to study the proposals and to compare the arguments. Often emotional appeals are made on both sides of these questions. But as a general rule the voters are more inclined to use the brains they have when they vote on the measures than when they pick candidates where they must respond not only to arguments but to personalities.

All of which sums up to this: don't be too conceited when you cast your vote, and brand the guy at the other end of the block as "unintelligent". The "intelligent" voter is a very rare specimen.

Milk Murmurings

10 milk has been spilt, and no blood either, but there is some crying going on. There is an undercurrent of opposition to the raise in price ordered by the milk board, expressed by an appeal to the court. Suppose we review the milk history of recent years.

In 1931 the dairy cooperative was formed, at a time when dairying was in a bad slump after long years of reasonable prosperity. The producers complained they were treated unfairly in the handling of "surplus" and that they had no way of telling what proportion of their milk really was surplus. A brief but tense milk strike was ended by a victory for the cooperative, which has since disciplined the dairy business effectively in the Portland-Salem area.

In 1933 a legislative act created the milk control board with authority to regulate the industry over the state, fixing quotas and prices, and regulating the handling of the surplus from producers of fresh milk. This board fixed the margins for distributors and for stores handling fresh milk. Its powers have never been fully tested in the courts; but a New York milk control act was sustained by the U. S. supreme court.

Under the operation of the law the dairymen have prospered. How much of the improvement is due to the law, how much to the powerful cooperative, and how much to improvement in conditions and increasing demand for milk we cannot say. But we observe two items which are not without significance. One is that a large chain grocery in Portland has installed its own milk plant. This is evidently its answer to the fixed margin requirement of the state board; it goes into the pasteurizing and bottling business itself, buying milk from the producers instead of bottled milk from the distributor

The other is the threat of a "consumers' cooperative." A Portland group of consumers proposes to form a cooperative dairy with distributing depot. Whether the idea will be put into practice, and if so whether the cooperative would succeed we do not know.

But these developments or projects indicate the truth of a point frequently reiterated in this column, that in the field of economics nothing may be regarded as static. The inventive mind, working in mechanics or in the law, will constantly make effort to work out some improvement in terms of their own interest. The producing dairymen have to face this fact the same as operators of stores, of factories and of transportation agencies.

The Pipeline Contract

ONDAY night the city council in all probability will award the largest contract in the history of the city, that for constructing the pipeline for the water system. We can think of no other job in the city's history running to so much money save the deal for the purchase of the water ley and the bay region around San plant. With so much money involved the temptation is bound | Francisco. to be strong for exerting ulterior influence to swing the con-

Saturday The Statesman was informed on very reliable authority in no way connected with the city government or any of the interests involved that an agent of special interests (not a member of the council) was prepared to distribute the most eventful years of his several thousand dollars among councilmen, and that certain "deals" had been made. We realize fully the gravity of these charges: but connecting them with other facts learned from independent sources we incline to give them credibility.

Therefore we publish this warning both to the private interests concerned and to the councilmen as well. Let there be no corrupt influence in the awarding of the waterline contract. The city council and mayor have only one interest to serve, and that is the interest of the people of Salem. Select for the material for the line that which will give the best service at the lowest cost for the longest period of time. A few thousand dollars for the initial cost is not the determining factor but the computation of cost over the life span of the material used. The council must make the decision; let them do so with an eye single to the public interest.

Ior this city administration, an achievement for which every individual who cooperated may well take pride. Let it not be sullied by corruption; for the scourge on the offenders will be merciless.

Bits for Breakfast

By R. J. HENDRICKS

Medare G. Foisy, first practical printer in Oregon, leading pioneer: does his house still stand?

This letter came to the writer's desk from James T. Matthews, Willamette University, Salem, Oregon, Oct. 8: "Can you answer this question?

Perhaps you would like to write a column about this man: "Is the Folsy home still standing on French Prairie west of Gervais? I may not have the name-Foisy, Foisey, Medora, Medorm Foisy. It is something like that. For you I think the clue is suf-

Thanks to Prof. Matthews. Of course, the compliment is apprec-

The series was largely made up migrant, who became prominent in pioneer Oregon, a resident of the lower French Prairie section | The cost of relief is growing and near Butteville, builder of the St. Louis Catholic church, secretary of the Oregon Pioneer association,

Rees and Foisy had made mutual promise that whichever died first the other would write his obituary. This was at Oregon City, while Folsy was serving in the memorable 1845 provisional

Foisy died June 11, 1879, on his French Prairie farm, and so the pledged duty fell to Rees.

Very briefly: Foisy was born in Quebec, Canada, in 1816. He was apprenticed to a printer at 18. The business of the office was in the French vernacular, while he longin Vermont.

Accordingly, at 21, he traveled to Louisville, Kentucky, to join a printer friend there, and soon went to St. Louis, Mo., where he worked for Mr. Chambers, editor of the Republic of that city, which had been started in 1835, and has long been the great newspaper of

In 1844 he surrendered his type 'case" for a jurney to the ultimate west.

He traveled with Rev. Joset and two other Jesuit fathers, going to the Flathead country, and from there Foisy made his way to the among the lower Ner Perces.

in order the little printing press and cases of type which the American Board mission had sent from Hawaii in 1839 by E. O. Hall, the first of all men having a slight knowledge of the printing trade to come to the Oregon country.

Rees said Foisy "did the first printing for the Nez Perce mission, consisting of school books, portions of the New Testament and hymns, all in the Nez Perce language, from copy by Mr. Spald-

He added: "This was the first printing performed by a practical printer west of the Rocky mountains and north of the Mexican republic."

Mr. Rees said Folsy reached French Prairie in December, 1844, and the following spring was elected a member of the legislative committee from Champoeg (now Marion) county, which convened at Oregon City June 24, 1845.

Wrote Rees: "It was at this session that the amended organic law was drawn up and passed, authorizing the election of a governor instead of the old executive committee.

"The legislative committee then adjourned for one month in order to submit the proposed system of government to a vote of the people, and which they adopted by a majority of 203. (It was 233, the vote being 255 ayes to 22 nays.)

"Mr. Folsy served during the remainder of this adjourned session . . . He was also a member of the first annual session under the reorganized government, which convened December 2, 1845 . . . After the close of the first aunual session under THE NEW OREGON REPUBLIC, for such it was, Mr. Foisy . . . joined a party going overland to California."

He had decided to revisit St. Louis; but the party he joined (in the spring of 1856) found the 1855 Rogue River Indian war still going, and it was attacked by the hostiles and one man killed and several wounded.

And when he reached California he there met the northern limits of the Mexican war and took an active part in the Sacramento val-

He accompanied a troop sent by John C Fremont to open communication with Monterey, where Commodore Sloat had previously hoisted the American flag.

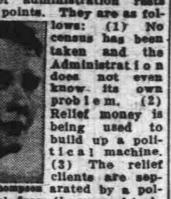

At Monterey he spent some of very eventful life. He enlisted as a soldier; acted as interpreter with the land and marine forces of the United States; became alcalde at Monterey; worked on the first English paper published in that city which was five times capital of a different government,

As soon as peace between the United States and Mexico was declared, in February, 1848, Foisy, still anxious to reach St. Louis, Aneta, bound for Central Amer-

(10) Not enough goes erage citizen, who can only functo the relief clients, too much to tion personally in the smaller the "favored few."

civic unit.

The Governor's proposals to reform are as follows: (1) Find out the facts. (2) Return relief is generally hostile, without very to the states, with the states deciding what work relief projects, of the corps of press agents atif any, shall be used. (3) Fed- tached to every branch relief ageral grants in aid to the states, providing they contribute a "fair proportion of the funds" and a criticism of the relief methods. 'qualify by complying with certain reasonable conditions." (4) All relief officials held to strict accountability. (5) All who are think, nowhere, by investigations engaged, to be selected on the of a Democratic program by Rebasis of merit and fitness. (6) publican state legislatures. That More aid to those seeking jobs in private employment. (7) Special deeper into partisan politics. training for those long unemployed or ill-fitted for employment. (8) Federal public works undertaken on merit and not confused with relief. "I am opposed to relief labor at relief wages for

the construction of such works." When the Governor promises to free relief from partisan polito the states, with grants in aid trations conform to certain reaticians. They are Mr. Harry Honkins's perennial headache. Cersome Republican.) Mr. Hopkins what other countries have done has fulminated but the Democrat- and what results of their poliic machine will not let him em-So things are hushed up. But simply passing the Administration back to the states will do the report, in full detail, and over nothing to mitigate this sort of the signatures of the members of Grants in aid on condition that local administration conform to certain reasonable qualifications is the way the present ties are committed in principle to system of relief is administered. The point at issue is what are "reasonable conditions." And these are not stated by the Gov-

Relief money has been used to make social experiments, in production-for-use, for instance. Also, there was originally a strong desire on the part of some members of the relief administration to use its funds to raise the wage level in certain states. It is a very questionable thing for a relief administration to do, desirable as the objective is. Whether unemployment relief needs are temporary or permanent nobody knows. But they are certainly recurrent. As for item 6, I doub whether any administration would open its files in the middle of a heated campaign to people whose interests are frankly partisan.

The suggestion that relief for the unemployed should be co-ordinated with efficient public labor exchanges is excellent. Register ing for work with a public em ployment agency ought to be i definition of unemployment and a condition of unemployment relief. In this way one could find out how many people on relief are employable and looking for jobs, when they worked last, and one could keep the record month by month. But if Governor Lan-don is elected and tries to do this, he will run up against powerful trade union opposition, for the unions want a labor shortage not a labor surplus. That pressure explains the present gov ernment's failure to do this.

With Governor Landon's insist ence that Federal Public Works should be undertaken on their own merit and not done by relief labor at relief wages. I am in hearty agreement. So, for that matter, is Secretary Ickes, But counteracting unemployment in times of depression-is not compatible with balancing the budget at such times. Also, in order to function, it would demand that public works should be planned in anticipation of crises, and planned by a board of public servants and engineers as divorced from politics as is the war col-Then, when it became apparent that unemployment Was beginning these works, already carefully planned, could be putinto immediate operation, absorbing labor as it comes on the market and before it is subjected to paupers' tests. But that kind of action requires social planning, sailed from Monterey on the ship and the Republicans shy at the word. One cannot devise works ica; the vessel putting into the of the kind when the crisis is alharbor of San Blas, Mexico-and ready upon us. That is the reawhile there the port was block- son why Mr. Ickes was forced to yield to Mr. Hopkins and the getting the Polk, Marion county

secure agreement on a procedure.

MOTT IS RECOMMENDED As a member of congress James W. Mott has rendered com petent service to Oregon first disshould be preferred over E. W. Kirkpatrick, of Clackamas county, his democratic rival. We have ne filusions about Mr. Mott. He has many "failings," chief of which is that he is a confirmed 'opportunist." His maneuvers to win Townsend group favor without losing favor with other groups have not been pleasing. He is not a statesman; he is a very practical politician. But he is, perhape, for this reason, a very efficient representative at Washington. He is diligent to give service to the "folks back home," He is an experienced legislator and in the labyrinthan mazes at Washington. He has worked like a beaver for roads, harbors and improvements of all kinds. Particularly important has been his work to preserve the O. & C. funds. It would not be practical to change. -Eugene Register Guard.

fixe was brief: "I'm going back to the freedom of the King. Hate scared, fat little clerk!" The surprise a mong old ac-

equaintenances was Medary Cole, the miller. A little younger than Francis

Tasbrough and R. C. Crowley, less intensely aristocratic than those noblemen, since only one generation, separated him from a chinwiskered Yankee farmer and not two, as with them, he had been their satellite at the Country Club and, as to solid virtue, been president of the Rotary Club. He had ing a Jew or a Hunky or poor, was yet flippant about the sanctitles of Main Street and Wall Street. They were neighbors, as Cole's "Cape Cod cottage" just below Pleasant Hill, but they had not by habit been droppers-in.

"Look here, Karl: you've al- | He burst out, one evening, "Jes- | lion members did get some 1936. But, golly, don't tell anybody I said that!"

And Cole went off shaking his head, bewildered-he who had ecstatically voted for Mr. Windrip. How to End Crime

On a day in late October, suddenly striking in every city and village and back-hill hide-out, the Corpos ended all crime in America forever, so titanic a feat that it Times. Seventy thousand selected Minute Men, working in combination with town and State police rested every known or faintly suspected criminal in the country. They were tried under court-martial procedure; one in ten was shot immediately; four in ten were given prison sentences, three in ten released as innocent . and two in ten taken into the M.

M.'s as inspectors. There were protests that at least six in ten had been innocent. but this was adequately answered by Windrip's courageous statement: "The way to stop crime is to stop it!"

The next day, Medary Cole crowded at Doremus, "Sometimes I've felt like criticizing certain features of Corpo policy, but did you see what the Chief did to the gangsters and racketeers? Wonderful! I've told you right along what this country's needed is a firm hand like Windrip's, No shilly-shallying about that fellow! He saw that the way to stop crime was to just go out and stop it!"

Then was revealed the New merican Education, which, as Sarason so justly said, was to be ever so much newer than the New Educations of Germany, Italy, Poland, or even Turkey.

The authorities abruptly closed ome scores of the smaller, more independent colleges such as Williams, Bowdoin, Oberlin, Georgetown, Antioch, Carleton, Lewis Institute Commonwealth, Princeton, like murder as a way of argument | Swarthmore, Kenyon, a 11 vastly -that's what really marks the different one from another but alike in not yet having entirely become machines.
