We would therefore recommend that Mr. Jones take down his Bible and read the 15th chapter of Job 2:3 which is as follows: "Should a wise man utter vain knowledge. and fill his belly with the east wind? Should he reason with unprofitable speeches wherewith he can do no good?"

We would recommend those thoughts to those who feel they must fight the Townsend plan. K. H. BLAKE 201 S. Com'l St.

FAVORS LOCAL OPTION To the Editor:

Answering your editorial of Sunday, October 11, we do most heartily commend your last statement, "the true fight against liquor must be made in the home (Sunday Schools and day schools) training youth to total abstinence." This is exactly what the W.C.T.U. is endeavoring to do in placing within access to all interested: mothers, school teachers, and Sunday school teachers, as well as any other workers, copies of Bertha R. But IF THE DRY PEOPLE EVER EXPECT TO BREAK THE STRANGLE-HOLD WHICH THE LIQUOR IN-TERESTS NOW HAVE IN THIS STATE THEY MUST BEGIN SOMEWHERE, AND MUST BE-GIN SOON. It is folly to wait for things to get so bad that people will rise up in revolt and vote the state dry. "THE LIQUOR INTERESTS ARE GETTING A FIRMER GRIP ON THE SITUA-TION THE LONGER THE PRES-ENT SITUATION LASTS." Linn county is also voting on local option this year. If these two counties succeed in their effort others will follow, and WE WILL LEAD THE PROCESSION TOWARD A DRY STATE. This is the method in making Oregon dry before and this is the way we must begin and work again to eventually bring about the ABOLITION OF THE LIQUOR TRAFFIC FROM

SURPRISED AT PROFESSOR Editor Statesman: In the issue of your paper of October 13, I note an article headed. "Panacea Basis Held in Error," in which Prof. W. C. Jones, professor of economics at Willamette university, says that, "The Townsend plan falls to distinguish between money and wealth; for it would give 10 million persons or 8 per cent of the people, 24 billion dollars to be converted immediately into goods and services." Now there are only 8 million people who would be eligible to receive the annuity, and it would cost no-one anything except for the first month -one and one-half billion dollars - then the money collected by the transaction tax would be revolved the next month, and paid over again, and during the

process wealth would be produced This in turn would be forced into circulation through constant demand for more goods, and thus produce more wealth, through labor producing more goods.

Again Mr. Jones says that, "It words, it would take 30 per cent of all production to pay the bill." This would absolutely not be the case for the tax will not be based on production nor income, but The word "liberal" takes for on the turnover, and it would granted that such knowledge, not only "put the wealth in the
