Wheat Values Sink as Re-Sale Argentine Stock Is Reported

October Deal Down 4 Cents

Rally Comes With Word of Lower U. S. Supply Than Thought

CHICAGO, Jan. 11 -(P)-Dom-nated chiefly by reports that It-aly is offering the re-sell abroad of some of the wheat bought of late from Argentina, wheat val-ues today ruled lower.

A tumble of nearly 4 cents a bushel in October delivery of wheat at Winneper counted as an additional unsettling factor.
On the other hand, 2,409,000 shels decrease of the United Mates wheat visible supply, an amount larger than expected, served to rally wheat prices a little at the last. Talk was heard also that Italy's offers to re-sell wheat were confined to near-by deliveries, and were more than offset by purchases of distant

Down % Cent

At the close, wheat was 14-7 under yesterday's finish, May 133
%-%, July 116 %-%, Sept.

and rye %-1% down May 112%.
Provisions were unchanged to Provisions were unchanged to 10 cents lower.

Somewhat improved shipping demand helped to life today's corn prices at the last. Rye and oats followed wheat. Provisions lacked aggressive buying support.

Treated Milk Is Available, O.S.C.

One of the most common di-seases of young farm animals may now be easily controlled as a result of the discovery by Dr. J. N. Shaw and Dr. O. H. Muth of the Oregon State college veterinary department that acidophilus milk will control lamb dysentery and calf scours.

This treatment was first explained to livestock men of the state a year ago and proved so immediately successful that the facilities of the department were taxed in supplying the demand for this special milk. As no other source is available, arrangements have now been made for it to be at the college, and it is believed that enough can be made at cost to supply the demand.

hilus milk, so named because it is first sterilized and then innoculated with lactobacillus, acidolphilus bacteria, had pre-viously been used for treating ba-bies afflicted with dysentery, but so far as known it had never been used for similar maladies in young animals until tests were started at

The milk may be obtained by ordering direct from the dairy department at O.S.C. at \$1.50 a galon. One gallon contains-128 fluid

Many Stocks Bean Grower Are Boosted

Soaring World Commodity West Stayton Woman Hurt Prices Sends Mart Up in Whirl

NEW YORK, Jan. 11-(A)-Reflecting soaring world commodity prices, stock market issues in this category were given a fast upward whirl today, many advancing 1

to around 5 points.

The Associated Press average of 60 stocks retained a net gain of .2 of a point at 71.8. Transfers totaled 3,076,330 shares compared with 3,216,560 last Friday. Outstanding on the forward push were Anaconda 57 %, Kenne-cott 64, and General Electric 56 %. U. S. Steel emerged with a gain of % at 80%, but Bethlehem lost 1% at 76%. General Motors was up % at 66% and Chrysler was off a much as 119.

Meat and Dairy Outlook Bright

Pork and Beef Supplies to Be Smaller in '37, Says Report

The market outlook is somewhat more favorable for meat and dairy products in 1937 than for crop products for cash sales, according to an agricultural outlook report just released by the O.S.C. extension service. Owing to the drought and high prices for feeds, livestock marketings have been heavy during recent months. but the total supply of meat will be smaller during 1937.

"The reduction will be most pronounced in pork and the bet-ter grades of beef. As consumer purchasing power is expected to be stronger in 1937, the general level of livestock and meat prices is expected to be higher than in 1936 and higher than for several years,"

on the other hand, the acreage of fall sown wheat is the largest on record and if growing conditions are about normal the production of several other crops will likely be larger than in 1936. That the outlook is far from uniform, however, with respect to the various spring sown crops and vegetables is pointed out in the commodity sections dealing with wheat, rye, feed crops, seeds, po-tatoes, hops, beans, flaxseed and various truck crops.

In respect to the current situation, the circular gives the general level of farm prices in Oregon at approximately 84 per cent of the 1926-1930 level. With farm prices around one-fifth higher, and more to sell, farm income from crop and animal production in Oregon during the 1936-37 marketing season will probably exceed that of the previous season by \$15,000,000, more or less. The report is available free from county agricultural agents.

Gardeners and Kanchers' Mart

PORTLAND, Ore., Jan. 11-(P)-Fruits and vegetables on the Gardeners' and Ranchers' market continued firm today, with California vegetables going briskly in anticipation to continued cold

weather and damaged crops. Slight advances were noted in potatoes, but prices at points of shipment remained unchanged. Hothouse tomatoes were off 1 cent for all grades. Some veg-etables showed the weather dam-

Percy Taliman was reelected chief of the department for the active fire fighting duty along with Elmer Holstrum, first assistant and Lester Gault, second assist-

Other officers elected were H. committee.

Canners' Short Course Slated For Next Month At State College Campus

The 16th annual canners' short course held in the food products laboratories at Oregon State college has been announced for the two weeks of February 1 to 13. It will include a number of new features in addition to the usual review of fundamentals and late developments in canning processes and the double seaming course in machine operation.

Cannery field men are to receive special attention this year with work in which they are interested concentrated in the last three days of the course. Another new feature is laboratory training in the detection of adulterants and foreign matter in processed foods.

foreign matter in processed foods.

Judging Team of State College Places Second At Utah Livestock Show

CORVALLIS, Jan. 10—Second place among teams from all western states was won by Oregon State college student live-stock judging team at the annual livestock show in Ogden, Utah, held the first week in January. Wyoming nosed out the Oregon team by 15 points. Colorado, Montana and Utah were next in order.

order.
The team, coached by B. W. Rodenwold, associate professor of animal husbandry, consisted of Elmer Smiley, Freewater, who was high man in breeding classes; was high man in breeding classes;
Philip Farrell, Gateway, second
man in fat classes, John Welbes,
Portland; George Penrose, Dayton, and Delmar Flint, Corvallis.
The team finished first in judging fat stock and third in breed-
