## Budget as Submitted Is Unworkable, Ways and Means Claim

## Needed Items Said Left Out

Warm Committee Sessions Ahead; "Dynamite" in Labor Bills Seen

Prospects for warm committee sessions and floor debates were becoming evident in the house of representatives yesterday as bills began to drop in the hopper and committees held preliminary organization meetings during the second day of the session. Two short meetings were held during the day, the rest of the time being the day, the rest of the time being devoted by the members to getting acclimate to their jobs.

The joint ways and means committee is going to be the "goat," Senator Dean Walker, senate chairan, declared while discussing the budget as submitted to the committee by the state budget department with the approval of the governor. The committee held its first meeting Tuesday after-

Members declared that a number of necessary items had been left out and that if the committee puts them back it will be blamed for making the expenditures. Comitteemen were also irked be-cause no provision had been made in the budget for seemingly nec-essary capital outlays, changes in the social security set-up, expend-itures on the Willamette valley improvement project, and salary increases in the higher educational institutions.

act, by which the state diverts 10 per cent of the funds of self sustaining departments to state use, is in the offing with the commit-tee members divided on the is-sue. Sub-committees are to be appointed to investigate individual budgets and make recomendations to the committee.

During the organization meet-ing of the labor and industries committee, Rep. Jack Wagner, Multnomah, warned the committee that they should "keep cool heads" in considering legislation coming before the committee. He also declared that unemployment legislation, of which committee he is chairman, was going to be "dyna-

prepared for introduction in the legislature within the next few days, it was announced yesterday. Names of the sponsors of the measure have not been definitely determined although the measure has been drafted.

The bill will repeal a 1933 act which gave cities and counties the right to license pin ball and marble games when they were determined to be "games of skill." The proposed law will also scirengthen the present slot machine act by providing for compulsory confiscation of the machines, one of the sponsors said.

The licensing act has been a source of trouble ever since its adoption, it was stated. There is now a suit in the Marion county circuit court seeking to determine the constitutionality of the act. Ralph E. Moody, assistant attorney general, had ordered arrest of board operators on the ground that the games were gambling machines prohibited by the constitution, and that the 1933 act could not legalize them.

members of the house. "As it had been decided that only democratic state representatives would be admitted to the caucus, someone not attending the caucus gave out erroneous infor-mation in regard to what took place at the democratic meeting."

## **Protecting Roads** Is Aim of Hubbs

County Engineer N. C. Hubbs plans to take steps to discourage the hauling of heavy loads over county roads when the present cold snap breaks and thawing sets in, he said yesterday. Serious damage could be done to many roads by heavy trucking during the three or four days after the thaw starts.

The engineer issued a plea to the public to watch for the thaw and during that period to avoid overloading the roads.

"After all the people pay for the roads;" he added; "so if they will only use a little care after the freeze, they will save them-selves the expense of unnecessary road repairs."

It's a tough break for the legislators. That is, their efforts to stay on the front page. During the regular session in 1935, the Hauptmann trial for the murder of the Lindbergh baby kept them on the sidelines. This time it is the search for the murderer of little 10-year-old Charles stattson, along with airplane crashes, that keeps them battling for first place in the news.
