Liquidation Grains Both Sides Atlantic Forces Wheat Down

Tumbles Top Of 21 Cents

Mart Falls 11 Points Under Season's December Maximum

CHICAGO, Jan. 27-(AP)-Shoved downward by pressure of heavy liquidating sales in grain markets both sides of the Atlantic, wheat fell 24 cents a bushel maximum

The tumble carried wheat to 11 cents below the season's high touched in December, and wiped out one-third of the 33 cents upturn scored in the preceding five months.

Rye Set Back Too At the close, wheat was 1% 2 % cents under yesterday's fin-ish, May 126 %-%, July 110 %-111, Sept. 107 %-108; corn %-2 cents down, May 108 1/2-1/6. July 103 14-14. Sept. 98-98 14: oats 76-114 off, May 49 16-14, and rye showing 1%-21/2 cents setback, May 109 1/4.

Provisions results were un changed to a decline of 22 cents. Corn, oats and rye all gave way with wheat. Rye, influenced by harder than wheat. Provisions lacked aggressive buying support.

Laying Flocks on Farms Over Country Show Increase of 5 Per Cent

Laying flocks on farms are three to four per cent larger than a year ago, the December poultry and egg report of the bureau of agricultural economics says, and about five per cent more pullets are on hand than a year ago.

Though poultrymen hatched sufficient chickens to increase their flocks 12 per cent, drought and high feed prices cut the increase. In the far west and south central states, the gain in laying hens, at six per cent, is larger than for the country at large.

Pasture Mixture Is Held Profitable, Linn County

ALBANY, Jan 27-C. H. Mitchell of Lebanon is convinced that a well-planned pasture mixture is a profitable investment, says County Agent Floyd Mullen. A mixture White extras of tall meadow oat grass, orchard grass, chewings fescue and English rye grass on hill land furnished pasture continuously throughed pasture continuously throughed Heavy hons, 1b. for 250 head of sheep, 100 head of goats and seven head of cattle, Mitchell reports. Native pasture across the fence would not carry more than one sheep for every two acres.

Alumni Future Farmers To Meet February 19-20

The second annual meeting of the Future Farmers' alumni group will be held at the Portland union stockyards February 19 and 20. and all boys who have been F. F. A. members or are now attending part-time school, whether members of an alumni chapter or not, are invited to attend.

Salem Markets | Stocks Gain Wee Recovery

Attitude of Wariness Seen as Flood Damages Are Still Unknown

NEW YORK, Jan. 27.-(AP)-Traders in today's stock market gave selected issues a recovery boost for fractions to around 2 points, but an attitude of wariness was evident as the financial sector attempted to assay flood damages and the probable extent of the automotive strike.

Steels pointed the way toward the rallying trail and other heavy industry stocks joined the movement. Specialties, including amusements, were well out in

Volume Is Lacking Lack of volume on the turnabout was a bit discouraging to commission houses. Transfers totaled 1,935,836 shares compared with 2,174,330 yesterday. It was the smallest aggregate for a full day in four weeks. Of the 910 issues changing hands, 484 advanced, 258 declined and 168 were unchanged. The Associated Press average of 60 stocks was up .4 of a point at 71.4, against a decline Tuesday of 1.1 points.
Among principal gainers were
U. S. Steel at 88 ½, Bethlehem
77 %, General Electric 62, Westinghouse 159%, Western Union 80%, Great Northern 4314, and Pennsylvania 41%.

Ray-Maling Will Make Bean Pack, **Woodburn Plant**

WOODBURN, Jan. 27 - New machinery will be installed at the Ray-Maling cannery which will include graders and snippers and blanchers for the use of canning beans this coming summer. This is a new venture for the Woodburn plant as heretofore this work was done at the Hillsboro plant, Canning beans during the midsummer season will probably mean a continuous run for the plant all season.

The cannery is asking all who were employed during the 1936 season to call at the time office to obtain their copy of the termination report which shows the gross earnings and hours worked by each employe during the sea-

Co-op Poultry Producer Meeting Set Feb. 12 at Baptist Church, Eugene

The Pacific cooperative poultry producers' annual meeting will be held at Eugene February 12, at the Baptist church, Ninth and High streets.

The program will include a report on the association's eastern sales agency activities by E. W. Benjamin, general manager of Pacific Egg Producers.

Current Agricultural Program Will Meet Approval of Oregon Farmers, Assistant Western Director Says

OREGON STATE COLLEGE, | Conser said that in regards to Corvallis, Jan. 27.—A prediction that the 1937 agricultural conservation program will meet the approval of Oregon farmers due to its adaptability to Oregon farm conditions over the 1936 program, was made here yesterday by C. C. Conser, assistant director of the western division of the AAA, before a gathering of representatives of the Oregon conservation committee and Oregon State college extension service officials.

The purpose of Conser's confermce with the groups was to explain details of the 1937 conservation program. From here he went to Douglas county where he plans to study the range problems encountered there.

Preceeding the discussion on the campus, Conser made an inspection trip through the burned- vallis, Roseburg, Redmond, Arover southwestern Oregon range lington and Baker in the next

Woolmen Oppose

Reciprocal Treaty Rehabilitate Range Lands of West

ALBUQUERQUE, N. M., Jan. 26-(AP)-The National Wool Growers' association went on record here today as opposed to continuance of the federal reciprocal trade treaty act and heard a strong plea for a similar stand against ratification of the Argentine sanitary convention.

An unscheduled resolution, protesting extension of the authority under which President Roosevelt may negotiate trade treaties, was presented at the opening session of the associaion's 72nd annual convention. it was approved without dissent. A new plan to rehabilitate ley is president of the group.

POLLY AND HER PALS

range land by a system of "deferred grazing" was outlined to the sheepmen by George E. Farrell of Salt Lake City, western regional administrator of the new AAA.

crop classification, orchards are

Brooder Making Told by Branton

Urges Home - Made Work Be Based on Approved Set of Plans

Recent developments in electric brooders have greatly improved both the under-heat and and seeding orchards to legumes over-heat types until the choice are allowed fruit growers in this is largely a matter of personal preference or local conditions, believes Ivan Branton, agricultural engineer at the Oregon Experiment station.

amounts to \$1 per acre with 80 cents for each additional acre, de-Satisfactory home-made broodpending on the productivity, proers of either type may be made, ductivity base to be established plans for the under-heat type being available at the State college and for the over-heat brooder Six regional meetings for the from various commercial concounty agents and committeemen cerns. are scheduled in Portland, Cor-

The Oregon bottom-heat electric brooder was developed jointly by the departments of poultry husbandry and agricultural engineering at the State college, and has proved highly successful for number of years. At a rather low cost a farmer may build a safe, efficient and reliable brooder by following the prepared plans available free.

Under-Heat Idea Used

The OSC under-heat brooder keeps the chicks on the screen, which provides a sanitary roosting platform free from moisture, This eliminates the wet litter problem and ventilation is taken care of by the natural flow of air in the brooder and by an adjustable ventilator in the top. The newer type over-heat

brooders now use a fan to force heated air down over the chicks and out of the brooder below the curtain. This dries the litter and also provides fresh air for ventilation. Where home-made overheat brooders are contemplated, Branton urges that such fans be included.

More Pointers Given constructed from approved plans recommended.
