Woodburn Fruit Growers Association Making Good Progress

Berry Acreage Added Rapidly

300 Members; Prices This Year Good but Output **Extremely Varied**

By C. GENEVIEVE MORGAN Three years ago the depression almost had a strangle hold of the Woodburn Fruit Growers association-morale was shattered, price was what you could get and be glad of it, contracts had expired, membership was dwindling . . .

Not a pretty picture, but O. L. Davis, president, can smile now as he recalls it.

For the Woodburn Fruit Growers association, as everyone who has followed fruit history knows, is not only back on its feet—it is up on its toes. Membership hits the 300 mark, new acreage has been added and there would be a whole lot more potential acreage right this minute if plants had been available this spring - in short, the association is in first class condition and at a point where it can and will go ahead and improve its property, says Davis, who has been growing berries for 15 years and now has nine acres in cane fruits.

Davis has been president of the Gladys D. Miller, secretary- treasurer, go bouquets for recent pro- rather than before, gress of this 15-year-old cooper-

this appears.

Boysenberry Gains With weather conditions, both last fall and this spring, putting teresting observations and tips: considerable of a kink in the berry situation—and naturally being one factor in the skyrocket marberry, a newcomer, is showing thinks, more of a disease, and other berries up and looks the probably anthracnose of bark (Marshalls fell way short, partly pesters youngberries. due to the heat scald in early June; logans apparently suffered winter damage, severely in the logan vines will have a 20 per case of older vines and from 20 cent crop this year; five-year-olds

caps, and so on.) Most of the Boysenberry tonnage in the county this year is the ground for my berries, instead around Woodburn, and though of dragging and packing the the acreage is small inasmuch as earth," Sargent says. the crop has been largely experimental to this point, a larger volume is expected next year. Max three rows each year at the op-Gehlar of the Oregon Fruit Pro- posite side of the patch from ducts holds a corner on the Boysenberry deal this year, having MODERN DENTAL purchased the Woodburn crop at 8 % cents, the same figure he paid for the pool's red raspberries. Gehlhar has expressed the bellet that Boysenberries are a coming

commercial deal. Red Hearts (with three times last year's acreage) are another berry that the Woodburn growers, in common with those in most sections hereabouts, are pinning new faith on. They look, for the most part, promising this year and are replacing the dwindling Et-

Ettersbergs Fickle Pranks the Ettersbergs have been playing on growers in recent years are illusted by report of one Woodburn grower that on a three acre field where he picked 2500 pounds to the acre two years ago, he last year managed to get off four crates. In contract Joe Doran, who has a hillside farm near Brooks, said while delivering Marshalls the past week that his Ettersbergs this year promise a ton to the acre on his

three-acre patch. Doran, by the way, just about takes county-wide honors for gooseberry production this year; from two acres he harvested six tons, or an even two tons to the Bystander Seizes Placard From Woman Picket

Improvement of Cemetery and Grounds of Church **Association Aim**

SCIO, June 12. — More than \$700 had been subscribed to the Providence Memorial association a few days ago, according to R. E. Peery, originator and one of the prime movers in the organization.

"The association has made very satisfactory progress in the past year in its effort to finance its plan of general improvement of the cemetery and grounds of historic Providence church," Peery said. It was expected that the amount would be considerably increased within the next few days, he added. Two separate funds are maintained, the fence fund and the school. memorial fund.

Permanency in character of planned by the committee in charge, Peery pointed out. Members of the association

have offered to donate flowers Smith. shrubbery in season for planting on the church grounds near the appearance.

Peery stated that officials and members of the association are 'profoundly grateful" to the pubundertaking, and "especially to contains a picture of Mr. and Mrs. the present officials of Provi- summer. 22-27 MILES PER GALLON

First built for England and France, two years ago, the 60-horsepower Ford V-8 is writing remarkable mileage records on American roads today. Private owners, fleet operators, and cab companies alike report averages of from 22 to 27 miles on a gallon of gasoline.

You can fill the tank of your Ford "60" and drive all day -300 to 400 miles - without stopping again for fuel. Besides costing less to run than any other Ford car ever built, it sells at the lowest Ford price in years. That's double economy!

The "60" delivers V-8 smoothness and quiet at speeds up to 70 miles an hour and its famous older brother, the "85," gives top performance and greater gasoline mileage this year than ever before.

Both engine sizes are built into the same roomy car, of the same advanced design, with the same modern features of comfort and dependability that make the 1937 Ford V-8 unquestionably THE QUALITY CAR IN THE LOW-PRICE FIELD.

at Dearborn Factory.
