

Steels, Motors. Edge Upwards

Select Issues Rally by 3 Points and More; Ford Ups Price

NEW YORK, July 31—(AP)—Buyers put their shoulders to the motors and steels in today's final July market and selected issues were pushed up fractions to 3 or more points.

The rally was touched off by the automotive group following announcement Ford had jumped prices of his cars. This was interpreted as paving the way for the other principal manufacturers to hoist charges as a means of offsetting expanding costs of labor and materials.

Steels stepped into line as early estimates of next week's mill operations indicated production would hold at least even with the current week.

In the van, also, were farm implements, aviation, a few utilities and rails.

That prices of stocks today exceeded the trading pace was shown by the turnover of 389,590 shares, compared with 508,790 last Saturday. The Associated Press average of 60 issues was up .6 of a point at 69.5.

Prune Prices Set By Milton Group

MILTON, July 31—(AP)—The Blue Mountain Prune Growers association will ask \$40 a ton for this year's crop. The action was taken by 150 growers who attended the special meeting called here.

Last year's price was \$32.50 a ton, but growers said a smaller crop, combined with higher harvesting costs, necessitated an increase.

The association also voted to eliminate No. 2 prunes sales, declaring that their shipment injures the No. 1 market.

The Milton-Walla Walla valley area produces from 690 to 875 carloads of the 2000 annually produced in the entire northwest.

Wind and spider damage has reduced the crop so that it probably will be smaller than last year.

Co-op not Subject To Motor Act, Held

The Apple Growers' association of Hood River is a cooperative, and transportation of products from the farms of its members to point of shipment, is exempt from the provisions of the state motor transportation act, Attorney General Van Winkle held in an opinion here today.

The opinion was requested by N. G. Wallace, state utility commissioner, who administers the state motor transportation law.

Wallace said the opinion undoubtedly would apply to other cooperatives and the exemption would cost his department a large amount of money annually.

Plan Townsend Lecture For Aumsville Thursday

AUMSVILLE—Gordon Fleming of Salem, will give an illustrated lecture on the Townsend movement, here at the Christian church at next Thursday's regular meeting of the club.

TO ALL GROWERS OF LOGANBERRIES

Should there be some fruit on your vines after the main harvest is over or when the fruit is often too soft or over-ripe for long distance hauling or for canning, we will pay full code price for all such fruit regardless of quantity. The fruit must be entirely free from mould or fermentation. Every crate is worth saving and this fully ripened fruit makes the best quality juice.

Grain Market Remains Weak

CHICAGO, July 31—(AP)—Wheat prices dropped two cents a bushel today in a thin, narrow market depressed by hedging sales that met with little speculative buying interest broad enough to support values.

Weakness at Liverpool and Winnipeg, instead of an expected upturn in the British market, induced liquidation in Chicago from the opening bell.

Wheat closed 1 1/2 to 2 cents off compared with yesterday's finish. Sept. \$1.18 1/2, Dec. \$1.17 1/2, May \$1.19 1/4; corn was 1 1/2 down to 1 1/2 up, Sept. \$1.92, Dec. 67 1/2, May 68 1/2; oats lost 1/2, Sept. 29 1/2; rye 1 1/2, Sept. 80 1/2, and lard was 7 to 13 cents off.

The first of the private crop forecasts, released by James E. Bennett and Co., estimated winter wheat production at 666,695,000 bushels, spring wheat at 197,626,000 and corn at 2,756,052,000.

There was little business in Canadian wheat for export overnight.

Test Fleet Will Be Here Tuesday

Twelve "highway laboratory" automobiles of standard make comprising the Texaco national road test fleet will be in Salem Tuesday on their 25,000 mile tour of the country, it is announced by W. F. Byers, local manager for the Texas company, who is in charge of local arrangements.

The cars are equipped with scientific instruments which will make possible compilation of information which the company declares will be the most complete data ever collected under normal automotive travel conditions.

This will include observation on fuel consumption, lubrication and general riding qualities. Forty-four observations are made on each car every fifteen minutes during the driving day, and a confidential report is sent daily to the chief engineers of the factories represented in the fleet.

Temperature readings of twenty vital points in the automobile, such as engine bearings, transmission and overdrive gears, differential gears, carburetor, coolant, fuel pump, steering gear, intake manifold and oil filter, will be taken. Technical recommendations are furnished the chief engineers cooperating in the test.
