STAY IN THE LOW-PRICE FIELD BUT STEP UP TO THE V-8 CLASS

WHEN you are asked to pay "Just a Few Dollars More" than Ford prices, go slow. Be sure you're actually getting more car and bigger value—and not just a bigger bill. It may be easy to spend more money, but it's not easy to get more car at anywhere near the same prices.

When you pay more, you should get performance at least as flashing as Ford performance. You should get at least an 8-cylinder engine. You should get positive brakes that will stop the car at least as quickly and smoothly as Ford brakes do. Will you get all these?

Will you get at least as much room? Most cars that boast a little longer wheelbase, waste space under the hood with a much longer engine. The Ford V-8 gives you room in the body where you can use it.

Check claims. Get facts. Make sure that any extra amount you plan to pay brings you corresponding extra value above the price of the Ford.

Finally, remember that the real reason why more than a million 1937 Ford V-8s have already been built is that America recognizes it as an outstanding car and the outstanding value for 1937.
