Bolstering Jury System Favored

Letting Judge Comment on Facts Would Improve Justice Says Lusk

Trial by jury is a custom inseparable from democracy, but while some of the custom's defects are accepted as the inescapable cost of democracy, there are others which can be overcome, Justice Hall S. Lusk said in an address at the Salem chamber of commerce luncheon Monday noon.

The greatest feasible improvement would be an amendment permitting the judge to comment upon the evidence, the newest justice of the state supreme court said. He pointed out that the jury their versions of the facts but that the judge, the only man in the courtroom who is both impartial and competent to help the jury weigh the facts, is not permitted to mention them.

Under common law and the federal laws, judges have this power, he said.

Not "Most Competent"

Many criticisms of the jury system are unwarranted, Justice Lusk said, referring particularly to magazine articles. He said, however, that the Oregon constitution's provision that the "most competent" citizens should be chosen for jury duty is not carried out.

Referring to the Bruno Hauptmann trial, the justice said he

thought Hauptmann was rightly convicted but asked "what chance would an innocent man have had?" in that courtroom where the trial was made a spectacle for the benefit of reporters, motion picture producers and thrill-seekers.
