Fleishacker Flash Flattens

Few names of bankers have been as widely publicised on this coast as that of Herbert Fleishacker of the Anglo bank of San Francisco. An aggressive plunger, he has dipped to raise funds for the Oregon mishis hand into most every important line of business in the west,-oil, shipping, pulp, electric utilities, newspapers. Evidentiv he kept his eye out for the main chance, for in two net cost to the Methodist missionrecent cases plaintiffs have won heavy damages against him ary society of the Jason Lee misor breach of trust or fraud.

In one case minority stockholders of the bank won judgment for the side profits Fleisnacker collected on a deal with the Bardes of Portland and Seattle, in which the bank advanced the money for purchase of war stocks of steel, but Fleishacker took the cut in profits by himself. Now judgment of over \$600,000 has been entered against him on behalf of the Lazard interests of France, on the ground of Fleishack. er's fraud in managing oil lands they owned in California.

Fleisnacker flashed in Oregon, owning the Northwestern Electric at one time, which he sold at nice profit to the American Power & Light. He bought the Portland Telegram, but found that unprotitable and disposed of it.

Fortunately rleishacker is not typical of bankers, though in the past decade a number of bankers showed up with plenty of base metal instead of gold in their characters. Most bankers are extremely strict in management of trusts. In no great enterprise of the kind handfield of business is ethic higher than in stewardship of other led by the Methodist board, and people's money by bankers. They may make mistakes in judg- by far the most important, in sevment, but they are generally scrupulous in accounting to those who have entrusted money in their care.

So there will be scant sympathy for Fleishacker among bankers and responsible business people. The sooner business is freed of those who would breach a trust, and banking of those who use bank funds or power for their personal profit, the better off the whole business world will be.

DuPonts Sue Author and Publisher

One of the "Sixty Families" is going to court about it. That is the E. I. duPont de Nemours company. It has sued Ferdinand Lundberg, author, and the Vanguard press, publisher, of the book which Secretary Ickes referred to freely in his recent radio address, for \$150,000, alleging the book and an advertisement for the book libels the company.

The book relates a choice morsel that has been previously reported, that the duPonts charged the government \$75 for burial cost for each worker who died of influenza at the Old Hickory powder plant in wartimes; and then sold the bodies for \$11. The company says the charge is false; that they erected the plant for the government for cost plus \$1; that their companies operated the plant for the government with a profit of less than \$300,000; that when the county where the Oregon mission. the plant was located refused to bury many of the workers who died, on the ground they were transient, the duPonts arranged for the embalming, coffins and burials, which was billed to the government as part of the operating cost; and the company bought burial sites at \$11 apiece.

On another charge in the book that duPonts withdrew in- his alma mater, Wilbraham acadustrial alcohol from the plant and sold it to Jess Smith for demy, Massachusetts, and enrolled 30c a gallon and he resold it for \$10 a gallon the duPonts claim they turned the plant over to the government in April, sons of Capt. Thomas McKay. 1919, which sold it to a Nashville concern in which no luPont "They were also grandsons of Mrs. was interested; and that if industrial alcohol was withdrawn McLoughlin, Lee's hostess at Fort it was after the duPonts were out of the plant.

It is a good thing to bring the issues to court. The charges are highly libelous. If untrue then the spreaders of the libel should be brought to book. The duPonts have come in for a lot of whipping. They can't be all bad. One daughter was considered a good match for the president's son and namesake. On with the lawsuit.

Alice Wouldn't Understand

There is room for some Lewis Carroll to write a new in the Methodist church there, and "Alice in Wonderland." He could find plenty of material at took part in the exercises. It was hand in the labor disputes which harrass the northwest, Alice his last appearance in an earthly would be mystified to see AFL's picketing CIO mills and CIO sanctuary. He died soon thereafpickets marching in front of AFL operations. She would be more mystified to see pickets wearing AFL banners marching up and down declaring a brewery "unfair" which is signed of the Oregon mission," because up with a regularly chartered AFL union. It would not enlighten her any to learn that in this part of the United States serious attention to the Macedonteamsters are the brewers; and that beer brewed by brewers | ian call of the Indians of the westis barred from the bars. She would be completely bewildered ernmost west, and demand an anto see a "peaceful picket" with an AFL sign, set upon by other swer to that call-and, specific-AFL workers and warned to desist.

Orchestras might well revive the tune the band played when Cornwallis marched out of Yorktown in surrender: "The World's Upside Down."

Idaho and Winter Sports

A new use has been found for Idaho. Its mountains have long yielded riches in gold, silver, lead, zinc. Its upland plateau has produced potatoes and dairy products. Now its mountains are being employed for winter sports. Located as it is well up on the rooftree of the continent Idaho has an abundance of snow and wintry weather. So it is in position to cater to the new enthusiasm for outdoor sports,the Boise Statesman says the whole country is going ski extensions thus outlined:

The Union Pacific started the craze in Idaho by picking Sun valley for the site of its now famous winter sports lodge. Here splendid ski courses are available in the bright maker and three carpenters and sunshine of Idaho, with more comforts than one has at home joiners. The mother mission. in the palatial lodge on the slope of the mountain, served transferred to the site of Salem. of course by the railroad. Another lodge was opened at Mc-Call in the Payette lakes region, and this caters to the folk with thinner pocketbooks. Most of the northwest folk will er and a physician. That projected be more at home at the latter place than at Sun valley, waere glamour and expense abound, though even there, we understand, provision is being made for housing the middle-income group.

Winter sports may be an expensive luxury; but they build up health and vigor. Children enjoyed ice skating and coasting at a minimum of expense; and winter sports may still be enjoyed without the requirement of a movie star's

Rainfall at Valsetz

The Oregonian comments on the wetness of Hoquiam, with its 108.25 inches of rainfall in 1937 and 113 inches in 1933. In the face of that, thinks the Portland paper, its home town with 66 in. rain record is in the cactus belt.

The trouble with boasting about records is that some one is sure to come forward with bigger figures. And here The site of the Nisqually mission is little Valsetz, perched up in the coast mountains. Its rainfall in 1937 measured 168.88 inches, or over 14 ft. In one day it had 7.36 in. precipitation and in one month 35.96 inches.

In comparison, Hoquiam may pass the prize umbrella over to Valsetz and tell the latter to come in out of the rain. wright physician, carpenter, blacksmith. More than that num-

The business-politics honeymoon seems to be on again. The president received five top-deck industrialists, including Alfred P. Sloan and Ernest T. Weir, the latter being a litigant who fought NRA. Uncle Dan Roper is having a tea party for big business men the present. and the president for Jan. 19. It is to be hoped the honeymoon will last that long. Previous breathing spells were of extremely short duration. One of the good signs from Washington is that Donald Richberg is back as caller at the White House. Richberg, one-time months before Salem centenary make further study relative to pertinent to the subject, including the most desirable size of the to the oil plant has been graded book, the best pasts to use and to make further study relative to pertinent to the subject, including the most desirable size of the book, the best pasts to use and to make further study relative to pertinent to the subject, including the most desirable size of the book, the best pasts to use and to make further study relative to pertinent to the subject, including the most desirable size of the book, the best pasts to use and to make further study relative to pertinent to the subject, including the most desirable size of the book, the best pasts to use and the most desirable size of the book.

Bits for Breakfast

By R. J. HENDRICKS

Jason Lee 100 years 1-13-38 ago getting ready for trip that brought about the founding of this city:

(Concluding from yesterday:) Having voted appropriations of more than \$50,000 for extensions of its missionary enterprise in Oregon, the Methodist board in early December, 1838, "requested Jason Lee to assist in a campaign sion," according to Brosnan.

Lee raised the required funds, and a great deal more. The total sion in the Oregon country was about \$125,000. Jason Lee in his campaigns raised for the society about twice that sum.

And when the mission was dissolved its property was sold forabout \$26,000, and would have been worth many times the original \$125,000 had the enterprise been continued, the six or more mile square donation land sites been finally acquired, and the properties administered advantageously.

That is, at Salem, the mission site below the site of Salem; at Oregon City, The Dalles, Tacoma, on the Clatsop plains, etc. The Lee mission undertaking was the first eral respects, even up to the present time.

In the six months period from December, 1838, to June, 1839, Lee conducted three extended missionary tours.

In his first or southern tour, he spoke in 12 cities and towns in the vicinity of Philadelphia and Washington, D. C. Says Brosnan:

* * * "His second campaign included 30 speaking engagements through New England, northward from Connecticut to Canada, His farewell tour included a series of day by day speaking engagements through 19 cities and towns of the state of New York."

Before beginning his southern tour, Lee filled a number of engagements in New York City and vicinity. The mayor of the metropolis threw open the city hall to Lee and his Indian wards. A side trip across Long Island to Bridgeport, Conn., brought a collection of \$195 in the last named city, for

8 8 4 Lee held meetings in Washington, D. C., on two parts of his tours, and large collections were taken in the nation's capital.

November 25, 1838, Lee visited in that institution John T. and Alexander McKay, the two young Vancouver on many happy occasions during his isolated years of Oregon life," wrote Brosnan.

Wilbur Fisk, then president of Wesleyan university, Middletown, Connecticut, who had been president and Lee's teacher at Wilbraham academy, was visited by Lee when he took in Middletown on one of his tours.

Fisk attended the meeting, held

Dr. Fisk was called the "father he was the first man, "speaking as one with authority," to bring ally to point to Jason Lee, his beloved former student, as the one most highly fitted, endowed and inspired to answer it.

While Lee visited the saintly Dr. Fisk in the last days granted to his former teacher this side of the pearly gates, they talked together of ways for the expansion of the Oregon mission. They drew a plan. Brosnan claims to have that precious piece of paper, which within three days will lack only that many 24 hour periods of being 100 years old, less an even year-for it was dated January 16, 1839. This plan called for the

4 5 5 Willamette (mother mission) an assistant farmer, a missionary steward, a teacher, a cabinet got all the additions outlined, and a number more.
