Silverton Airs Ideas Pro and Con In Present Dog Poisoning Epidemic

SILVERTON—Some Silverton home owners are reporting that while they themselves would not poison dogs, they are very nearly in sympathy with the dog poisoners who have received the public's condemnation in the community recently.

Speaking not as officials but as individuals some members of the city council Monday night informally discussed the complaints against the dog poisoners. While they rather objected to the method, they were somewhat in sympathy with the home owners who resorted to means within their reach to rid their gardens of dogs who dig up valuable flowers and plants.

Dog owners, said those discussing the matter, should learn to keep their dogs at home, tied or fenced, as home owners could not be expected to sanction having their lawns dug up and their plants tramped down.

A series of dog poisoning has been carried on Silverton in recent weeks. Officials are endeavoring to trace down the source of the poisoning as this, they feel, is not the method to handle the matter.

PISSAHO'S MOTHERHOOD (In Group 11)

This picture is typical of the "Blue Period" of this modern master, who has been called the weathercock of modern art, for every time he changed his style, a thousand imitators changed theirs. He is unquestionably the most influential painter living today. Succeeding the "Blue Period" there was a "Rose Period" and subsequently a "Cubistic Period." Though the last was borrowed from the Cubists he is considered "The Father of Cubism." His untamed restlessness is still casting about for new artistic worlds to explore. He is a best seller in the world's art market.
