Mexico Only Importer to Order: Domestic Crop Outlook Is Good

CHICAGO, March 2 .- (AP)-Notwithstanding transient upturns due to some Kansas dust storm reports, Chicago wheat values ranged lower today and ended at

fractional losses. Most importing countries avoided purchasing wheat from the United States. The sole conspicuous exception was Mexico, which bought \$70,000 bushels to be shipped all rail from Kansas City. Moisture Is General

Domestic crop advices were in general auspicious, and forecasts pointed to likelihood of moisture throughout the greater part of the domestic grain belt. The southwest in particular noted satisfactory moisture prospects.

At the close, Chicago wheat futures were 35/2-% under yesterday's finish, May 931/2-14. July 88%-%; corn unchanged to slightly higher, May 59 %. July 60%-%-

Certified Potato Seed Cost Is low

Oregon potato growers, who want good seed, have a rare opportunity to buy it this year at very little expense, says E. R. Jackman, extension crop specialist at Oregon State college. High prices for potatoes often

create a demand for good seed. For example, certified seed cost \$3 to \$4 a hundred last spring. five thousand bushels of wheat, The same product costs \$1 this

Many wise potato growers are taking advantage of low prices to get good certified seed. All counof growers of certified potatoes.
