Style - Smiles - - - by Gretchen

We hope our hostess will be less casual when she sees the actual damage done. So far she's still too busy admiring the victim's spring green holoer ensemble, as fresh and vibrant as it sounds. Sophisticated, too, with its black and white polka dot silk sash and lining. Flat neckline and bracelet length sleeves are important details. Her own spring mood is expressed in violet sheer crepe, pigskin belted.

Drying Weather Prepares Soil For Digging

There's one important change that has come into a housewife's life these past days of drying weather, she changed from "dish-pan hands" to "gardening hands" and likes it.

It's perfectly all right to explain roughness of fingertips and a bit of irregularity of fingernails to gardening activities. But even at that there's not too much reason for darkened hands, there are gloves on the market that are soft and pliable enough to use without a feeling of clumsiness, and they are of a size to fit women's hands. Then, too, the leather seems to contain enough of the un-tanned properties to keep hands moist underneath. Rub a little cream into the skin, put on the gloves, do your gardening and you've a beauty treatment.

With this new style of wearing a bright colored handkerchief on the head, a gardener can look pleasant-like and be stylish all at the same time. It's a handy way to keep the back of the neck from sunburning.

About shoes, children's rubber boots can be purchased quite inexpensively and are large enough for many women. They are handy these dewy mornings, and turn a rainy day into a gardening day.

Smocks that button in the back are a good deal more practical than the open front ones. After all, it's the front that needs protection in both gardening and housework.

And about your shovel, one that's a little lighter in weight and maybe a bit smaller in size, yet large enough to be practical, will be a handier tool for a woman than one that's too large. A good sharp edge means that it goes into the earth easier. Good tools take less effort and more work accomplished.

Something that's not quite on the gardening subject may be a practical idea, now that spading is being done and before tender annuals are in, is the time to teach the family dog his garden manners. Teach him that spaded ground is no place to dig, or walk, or sleep. Naturally without some explanation in the spring he won't understand that new garden spots have been made and he must change his place for relaxation.

Waldorf Salad Goes Modern Now

Waldorf salad takes on a new form when apple butter is an ingredient. Or this concoction might be served as a simple dessert dish.

PEACH CUP, SALAD OR DESSERT STYLE
6 servings of head lettuce
1/2 cup diced celery
1/2 cup chopped nuts
1/2 cup seeded raisins
2 or 3 tablespoons apple butter

On bed of lettuce arrange two peach halves for each serving. Fill center with mixture made by combining the celery, nuts, raisins and apple butter. Garnish with mayonnaise. Serves 6.

Apples Make Baked Dessert Dish

Its name is apple cake, but it is really more like a good baked fruit pudding. So try this:

APPLECAKE
Make a syrup of 2 cups sugar, 1 cup water and 1 tablespoon butter. Peel and halve apples and cook until tender in the syrup. Stand them up in a baking dish.

MEN LOVE GIRLS WITH PEP

If you are peppy and full of fun, men will love you to dance and parties.

PEP, if you are cool, blonde and tired, men won't be interested. Men don't like "cool" girls. When they are tired they want girls who are full of pep.

For three generations one woman has told the secret to go "peppy" through Lydia E. Pinkham's Vegetable Compound. It restores tone up the system, and brings the discomforts from the functional disorders which women must endure.

Why not try LYDIA E. PINKHAM'S VEGETABLE COMPOUND?
