## Passage of Navy Bill Is Forecast

WASHINGTON, March 18.—(AP)—The House all but passed the administration's big navy bill today. It completed consideration of the measure, deferring a final vote until Monday.

Practically all observers expect the chamber to give emphatic approval to the measure, which authorizes 46 new warships, 22 auxiliary vessels and 950 airplanes.

However, a section on "naval policy" was stricken out on a point of order. As sponsored by Representative Vinson (D-Ga) it would have committed the United States to a fleet big enough to defend both coasts simultaneously and to a policy of non-aggression.

It was reported that the administration desired elimination of the amendment, in the belief that, if it were retained, it might lead to controversy in the senate and possibly attempts to restrict the fleet's sphere of operations drastically.
