Losses Are Small on Whole and Some Make Gains of Good Size

NEW YORK, June 27-(AP)-The rousing stock market rally ran into profit selling difficulties totions to more than a point.

day and leading issues shed frac-There were many resistant spots throughout the list, however, including aircrafts and specialties which managed to emerge with sizeable advances.

On the whole, brokers thought, the list acted exceptionally well. Most had been looking for a larger correctional setback in view of last week's upturn, one of the sharpest in many years. The fact that the Associated Press average of 60 issues was only off .5 of a point at 45 was seen as highly constructive.

401 up, 343 Down The dip in the average was due to the presence in this composite of a few shares that were down several points. Actually, of 907 stocks traded, 401 were up, 343 down and 163 unchanged.

Modest recessions were widely distributed at the opening. A fast buying move got under way shortly thereafter and, for a while the ticker tape was as much as four minutes in arrears. Volume dwindled until just before the close when it expanded briskly under selling in steels and motors. Transfers totaled 2,105,840 shares compared with 2,290,540 last Friday.

Wool in Boston

BOSTON, June 27—(AP)—(USDA)— Bidding for wool in the Boston market is more active today than for many weeks. Spot wools were getting some call but the bulk of the bids were on wools offered from the country where prices had been below the Boston spot market level. Users have bid up to 60 slightly on fleece wools offered from the middle west.

Orders have been placed on country

packed mixed grade, three-eighths and quarter blood bright fleecas at 24 to 24½ cents in the grease, delivered east, but difficulty in filling these orders had arisen because of advanced asking prices in the country.
