grass were sown. This program will be continued, together with the application of ground limestone and the turning under of all straw and some green manure crops.

"Crop acreages for this season are as follows: oats and vetch, 28 Frankie Hobbs, deceased. acres; crimson clover, 17 acres; gray oats, 35 acres, 20 acres of which are fertilized; Alsike clover and rye grass, four acres; alfalfa, three acres; orchard grass, 22 acres, all of which is fertil-

Sow Orchard Grass "Orchard grass is being sown as a perennial seed crop on a field at the farthermost corner of the place from the buildings. This field is steep, and susceptible to soil erosion. Ammo-pho A, at the rate of 100 pounds per acre, was sown with this seeding and on 20 acres of gray oats. It is the first experiment with the use of commercial fertilizer on this farm,

"Practically all crops will be combined and the straw turned back into the ground thus adding valuable vegetable matter to the soil. Commercial fertilizer will not
