Playing for Position

Special correspondents writing from Washington exercise wide latitude in their political speculations. Regular news the place was afterward changed services, like the Associated Press, confine themselves closely to Warsaw, when Jane Porter's to facts as they develop. So when the AP sent out a dispatch In after life, Hay was to say: "I from Washington Tuesday saying that the journey of Pres. hope every man who was engag-Roosevelt may be the "most spectacular bit of political torched in the outrage is called Smith in Heaven." (Might not the bearing he ever has done," there should be no doubt that the forecast is well grounded.

Ostensibly the purpose is to support his friends who are eta, Oregon, to Salem?) running for reelection. Actually the effort is more probably one to strengthen hold on the party organization looking lic school at Spunky Point, acadahead to 1940. This may not mean that Mr. Roosevelt is planning to run for a third term, though that possibility is not to idence, R. I., entering the last be counted out. It does mean that he is determined to prevent named institution at 17, in the the party organization, control of the convention and nomin- sophomore class. After graduaation of the next candidate to pass into the hands of demo- tion from Brown, it was sugcrats who are not blown-in-the-bottle new dealers.

The immediate Roosevelt program is largely completed. because he was a poor horseman; A reorganization bill can be passed at the next session if it then spurned a suggested idea will carry some amendment chiefly designed to protect the of trying for a Baptist preacher country from arbitrary power. The monopolies investigation gives no indication of specific legislation because it has not lawyer, in the office of his uncle, even started. Its proponents are not sure whether the remedy Milton Hay, at Springfield, Ills., lies in more trust-busting or in some form of NRA which fos- next door to the office of Abraters price-fixing and hampers competition. Of course the administration may develop new proposals, and undoubtedly the left-wing advisers are eager to swing the country much farther toward state socialism than the president has been willing to go; but there is nothing definite on that line now.

In any event the democratic party seems headed for a split. Thousands of democrats are not in sympathy with the leftish ideas of the persons now in Roosevelt's favor. They fear the boring from within of socialist and communist elements. If Roosevelt persists in heading leftward these democrats will not go with him. That is what is back of the boomlet of Vice President Garner for president. He says he will not run for a third term in his present office, and Sen. Logan, a loyal Roosevelt supporter hitherto, chimes in that as candidate for president, Garner would be "mighty hard to beat." Garner is poison to the Hopkins-Henderson-Corcoran following, though he is a prime favorite among the senators.

So the true meaning of Roosevelt's coming tour of the country will lie not so much in his support of certain candidates, most of whom appear quite certain of success anyway, but in his playing for position in the battle of 1940.

Suzanne Lenglen

When girls first began taking active part in sports, they were careful to be extremely ladylike about it. Tennis has long been considered a suitable sport for girls, but their early participation was rather diffident. They usually played mixed doubles, waved feebly at the ball if it came within their reach, and let their male partners do all the running.

Suzanne Lenglen of France changed all that about 1913. times that tried men's souls, up Whitelaw Reid a vacation. She even excelled men in dashing about the court, trying for everything, possible or impossible, and performed marvelous acrobatics in the course of play. So long as she remained an amateur, even Helen Wills was never her match.

Suzanne Lenglen died the other day at age 39-of pernicious anemia. It is difficult to associate her with the adjective Hay wrote poetry and prose in sues out of which came the "acemic." But pernicious anemia is something different; a P. ris and dreamed of the com- Spanish-American war, etc. condition resulting from disease of the blood-forming organs. Whether her strenuous training and competition regimen in youth had anything to do with her fatal illness can only be conjectured. Girls' participation in violently energetic sports is too recent a development to afford any general conclusions. That they can and sometimes do injure health by overdoing it, is well known. On the other hand, the influence of the Suzanne Lenglens, Helens Wills and Jacobs, and Sonja Henies undoubtedly encourages many girls to a beneficial moderate participation in active sports. The race may be the better for their example.

Dispute Closes Mill

A Portland sawmill is shut down because of jurisdictional troubles between rival labor organizations. The mill was once reported as a CIO mill; then AFL's claimed a majority of the workers. CIO called for a quiz by the NLRB in which effort was made to show interference with the real choice of the workers. The AFL demanded a contract from the company. The distracted company finally shut down when pickets were put on.

It is just another outbreak in the bitter fight for authority in the field of labor relations. The veteran AFL body is out to crush the new CIO outfit which it regards as traitor to the cause. The result is that the employer who is ready and willing to operate at the going wages and working conditions is so harried and beset that he can't run, so the millhands are

out of jobs and the employer's plant stands idle.

These persistent jurisdictional disputes are rousing public opinion. Even Pres. Roosevelt denounced them. They do the labor cause no good and if continued will lead to corrective legislation. There is a limit to the patience of the public.

Shifts in Age Groups Estimates are reported on the population curve of the United States. Experts say the population peak will be reached at 158,000,000 in 1988, and that the percentage of aged persons will increase. Persons over 65, who now number six percent of the population, will constitute 15 per cent in 1980. Those under 20 will drop from 37 per cent now to 25

per cent in 1980. Immediately the question arises as to the cost of old age assistance by 1980. If the percentage of aged increases two and one-half times, the cost of public support for those in need will follow the same proportion. But will there be corresonding reduction in expenditures for education if the youth roup declines? It is easy to see that shifts in age groups may ake advisable readjustments in government budgets. The ifficulty will come in imposing decreases. Portland has ound that out in trying to close some of its grade schools where school population has declined.

Facing a deficit of at least four billions next year the country should get ready for higher income taxes. Sen. LaFollette has been rying for years to get the rates raised and exemptions lowered. If we are going to make any pretense at financial solvency the tax intake will have to be greatly increased very soon. When the tax ploneers ence to work the people will begin to realize that pay-up-day is at band.

To what extent statements made on the White House steps reflect the president cannot always be said. Sometimes they do. But sometimes politicians visit the president and, on emerging, take advantage of the White House steps to make statements of their own. It was quite well understood, however, that President Roosevelt wished that all demoratic senators who opposed the court measure should be subjected to discipline. The ban against Senator Van

Nuys by the democratic governor of the state and other heads of the Indiana organization was repeated again and again. They were able to make their ban effective because in Indiana senatorial candidates are nominated not by direct primary but by state conventions, and it is easy for party leaders to control state conventions.
