Upturn Follows Disclosure That US Paid as High as 801/2 Cents

CHICAGO, Aug. 31.-(AP)-A brisk buying movement in the last 15 minutes of trading today following disclosure that the government had paid as high as 80 1/2 cents a bushel for wheat in expanding its export subsidy program caused a strong rally in wheat futures that wiped out early losses and substituted net

fractional gains. Dealers who previously had sold wheat "short" and today covered their positions after the premiums paid by the government were announced were helieved to have been buyers. Commercial interests who had sold to the government and were listing hedges by purchasing futures either at Kansas City or Chicago also were credited with aid in the recovery. The government was reopried buying southwest hard wheat, much of which is understood to be hedged in this

Deliveries Are Heavy After trading ceased the clearing house disclosed that 3,685,-000 bushels of wheat had been tendered to satisfy September contracts tomorrow and that 2,-609,000 bushels were retendered. This amount of delivery on contracts is unusually large for the first day, traders said. Wheat closed unchanged to % higher, compared with yesterday's finish, Sept. 63, Dec. 64 %-

Wool in Boston

BOSTON, Aug. 31-(AP)-(USDA)-Business was very quiet in the Boston wool market today but quotations on greasy, shorn domestic wools were fairly firm. Good French combing lengths fine territory wools in original bags were steady to firm at 62 to 65 cents, accured basis, with only limited quantities becoming available occasionally at prices on the low side of the range.

A little interest was being shown in country packed mixed lots of % and 14 country packed mixed lots of % and blood bright fleeces and even though

quirements were comparatively limited it was found necessary to pay up to 30 cents in the grease, delivered east, to fill the orders. Only an occasional lot was available at 28 to 29 cents in the grease.
