

### School Opens 19th at Dallas

#### High School Students Are Requested to Register Before That Date

DALLAS—The Dallas city schools will open this year Monday, September 19, according to City Superintendent R. R. Turner.

All high school students are requested to register in advance of the opening date. For this purpose, Supt. Turner and Principal Sidney E. Whitworth will be in the office, beginning on Tuesday, September 13, to advise with parents and students on the selection of studies. Office hours will be from 9 a. m. to 5 p. m.

As a matter of convenience it is requested that the following days for registration be observed as far as possible. Seniors, Tuesday, September 13; juniors, Wednesday, September 14; sophomores, Thursday, September 15; and freshmen, Friday, September 16.

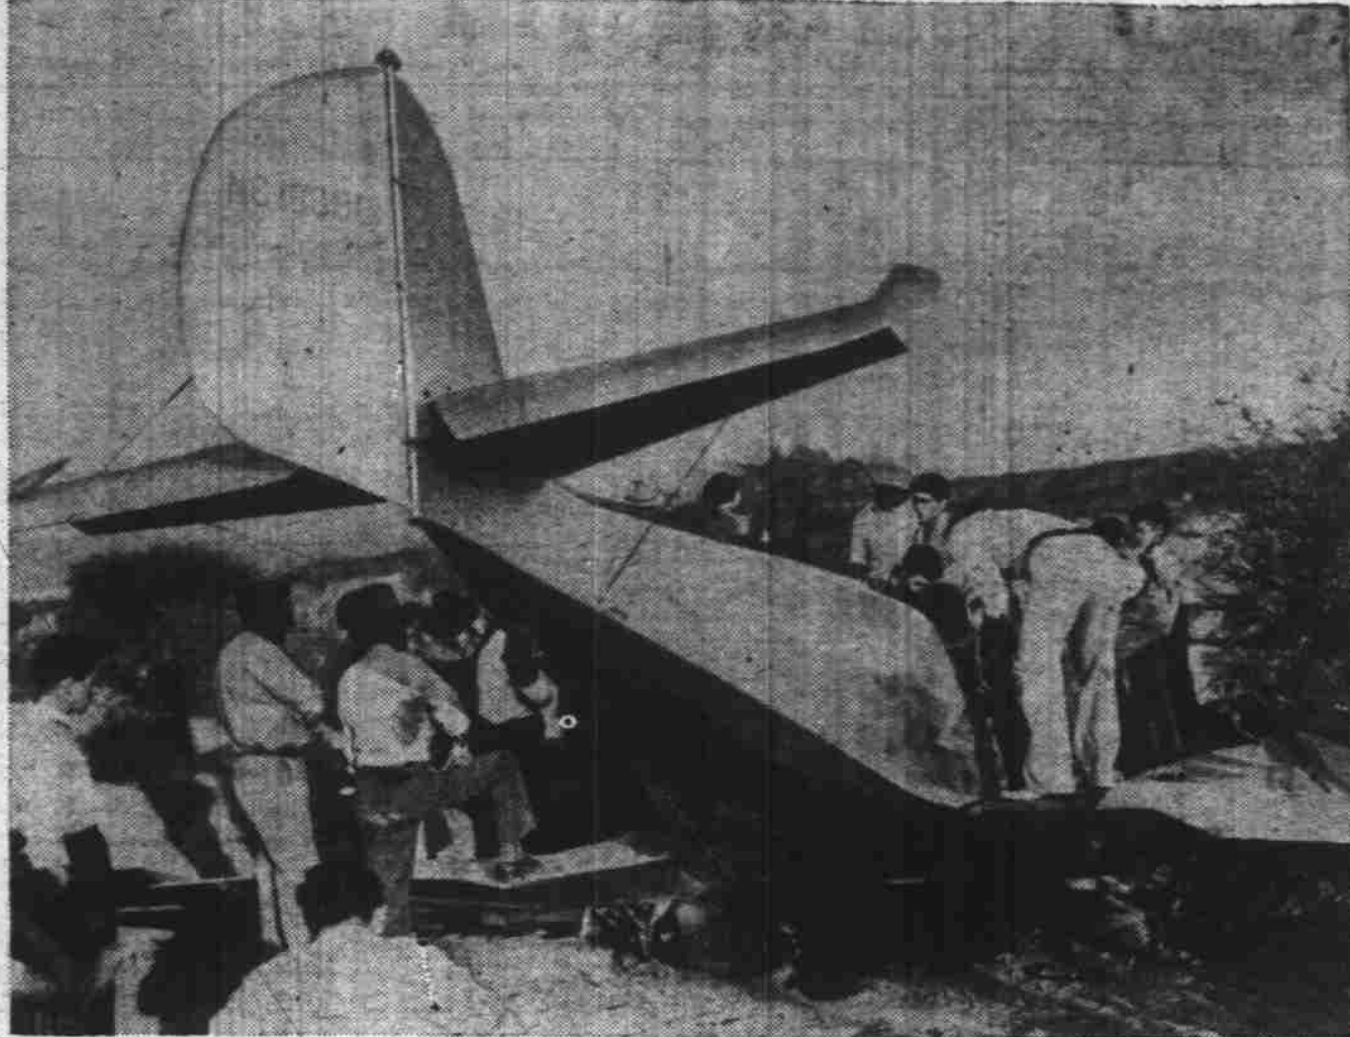

#### Some Classes Restricted

To accommodate those who can not conveniently call for registration during the day, the office will be open on the evenings of Friday and Saturday, September 16 and 17. Early registration is desirable as certain classes are restricted as to the number that may enroll. Thus, those who delay registration may find classes closed to them. Such classes as bookkeeping, cooking, chemistry, manual training and biology are limited as to such number as present equipment and crowded conditions can accommodate.

New, with this session, a class in journalistic writing will be offered as elective in 3rd and 4th years. Also a definite period will be assigned to mixed chorus, to be directed by Mr. Eckman.

Parents are urged to have their children enter on the first day of school, whether in high school or elementary grades.

### China Presumed 'Marauder' at Benedict House

SUVER—When Mr. and Mrs. Steve Benedict returned home from the state fair Monday evening they found broken glass all over the living room and most of the upper part of the south window out.

The first thought was that someone had shot through the window but as no shot could be found and China Pheasant feathers were scattered about the room it was decided that a pheasant must have hit the window with terrific force.

It had torn its way through the window shade also and an electric lamp about four feet from the window was broken. The house was searched but the bird had evidently found its way out. What actually happened will likely never be known.
