

RCAs Offer 44 Improvements

Electric Tuning for all Included; Phonograph Interest Revives

Forty-four improvements including electric tuning for models in every price range, a "noise eliminating antenna system," and a new Electrical Magic Voice mark the new series of radio instruments offered by RCA Manufacturing company which, this year, reverts to the 40-year-old trademark in designating models as RCA Victrolas in order to emphasize the revived interest in the record playing aspect of electrical home entertainment.

Among the new models offered this year, there are 22 different AC table and console models, 5 AC-DC table models, eight radio-phonograph combination models, some with automatic record changing mechanisms, and Victrola attachments enabling one to play records through the radio.

There are also five battery sets offered for farm areas and seven auto radios—two with automatic push button tuning.

Phonograph Controls
Of particular interest is the fact that every new RCA Victor model has a Victrola push-button control which entirely eliminates installation problems for the new Victrola attachment that plays 10 or 12 inch records through the radio set. This attachment may be placed at a dis-

Plays Records

This Zenith Arm Chair Model combines phonograph and radio in a most convenient form. Excellent fidelity is keynote of phonograph's performance; radio has tip-touch tuning and gets both foreign and domestic broadcasts.

tance from the set in order to do away with the bother of getting up to change records or adjust volume.

In every RCA Victor model of 8 tubes or over, this year, there is a Master Noise Eliminator, a feature which, in combination with the new Master Antenna System, is said by RCA to do away with the effects of local interference from household electrical appliances and the like.

From a musical standpoint,

RCA Victor High Fidelity

Designed to harmonize with any home, this unusually beautiful piece of modern furniture houses RCA Victor's new High Fidelity receiver equipped with improved electric tuning and a host of other features. It brings in foreign and domestic broadcasts.

Best Bets from the Short Wave World for Foreign Tuning
