Wheat Shows Much Power

Australia's Estimated Yield Reduced With Export Outlook Lower

CHICAGO, Oct. 10.—(AP)—Considerable backbone showed itself in Chicago wheat prices today, the market here displaying at times notable power to recover despite downturns of the Liverpool market.

Helping to stabilize values in Chicago was \$92,000 bushels decrease of the United States wheat visible supply total, sharply contrasting with an increase of an equal amount a week ago. Southern hemisphere reports of better weather for crops had only a transient depressing influence here.

Stocks and Bonds

At the close, Chicago wheat futures were 1/4 cent off to 1/2 up compared with Saturday's finish, Dec. 6 1/2-7 1/2, May 6 1/2-7 1/2.

During the last half of the day, Chicago wheat prices achieved net gains of 1/2 cent a bushel much of the time, whereas earlier the market was down an equal fraction.

Traders here noted that Australia's estimated yield had been reduced to 130,000,000 bushels, indicating an exportable surplus of but 78,000,000 bushels. Last year the Australian harvest was 188,000,000 bushels.
