

Mill Contract Up for Vote

Complies With Fair Labor
Act but Provides for
old Employees

SILVERTON—The IEU will hold its regular meeting Friday at 8 p. m. at the hall, when it is expected that the chief topic of discussion will be the 1939 Silver Falls timber company contract which has been signed and returned by M. C. Woodard of Portland, manager. The contract will also be signed by R. D. Bowen, chairman of the local IEU, and E. J. Boesch, local secretary.

The contract has been read and discussed before the local chapter a number of times and some changes have been made from its original draft. However, as signed by Mr. Woodard, no great changes have been made. In order to comply with the fair labor act, the hour schedule has been changed from the former contract to the newer one, providing for a 40-hour week with an emergency clause providing for 44 hours.

Closed Shop Included
The closed shop clause has been included, giving preference to IEU men. Under this the employer agrees to hire only employees who have been approved by the IEU employment office or conference committee of the local IEU. If it is adopted in its entirety Friday night, the employer will also recognize the IEU as the sole collective bargaining agency.

However, a seniority clause will likely protect the old employees of other unions. It is likely that the man who has been in the employment the longest and still does his work satisfactorily will have priority rights.

Local mill workers have discussed considerable pleasure at the new contract as drawn up. There are 348 paid up members in the Silverton IEU local.

SCOTT'S MILLS—Earl Groshong, who owns a farm here but who has operated a campground at Netarts since last fall, while visiting here Wednesday described last week's coast storm.

"It was a quiet day with scarcely any breeze and we were expecting high tide in about 1 1/2 hours, when all of a sudden from apparently no place at all 'old briny' went on a rampage. From our camp, Sunset Cove which is up about 50 feet, we had a good view.

Snap Heavy Cable
"There were plenty of waves that high, but they broke up and tossed debris only about 30 feet higher than usual. During an interval we had fastened a 48-foot log about 4 feet through with a
