

Provides for Bean Workers

Site Will Be Chosen Where Most Laborers Will Be Accommodated

STAYTON—A 200-family portable unit farm labor camp will be located near Stayton by the government to accommodate bean harvest workers, according to an announcement of the farm security administration.

It depends upon how soon the final plans can be completed and construction started whether it will be established in time for the coming season or not.

The site has not been selected but it will be located where it will provide the employers with the most workers during the longest season.

The Stayton camp will be one of four units. The equipment will include 200 tent bases, hot water heating and cold water pressure unit, garbage disposal unit, trailers for manager and for resident nurse, office tents for manager and placement clerk, shower units, sanitary toilets and large tent for recreation and meetings.

The camps will serve only former farm families and others depending upon seasonal agricultural work for part or all of their livelihood. Camps will be under close supervision of a resident manager cooperating with a camp committee elected by the occupants, in keeping the camp sanitary and orderly as well as planned for social, recreational and other activities.

HELP KIDNEYS PASS 3 LBS. A DAY

Doctors say your kidneys contain 10 million tiny tubes or filters which help to purify the blood and keep you healthy. Most people pass about 3 pints a day or about 3 pounds of waste matter. If you are unable to pass this waste matter, it builds up in your blood, and causes kidney trouble. This is the cause of rheumatism, headache, back pain, loss of sleep and many other ailments. You can keep your kidneys in good health by using Doan's Backache Kidney Pills. Don't wait until you are crippled by Doan's Pills, and especially by getting rid of the 10 million of kidney tubes that are in your back. Get Doan's Pills.

Wheat Drops Nearly Cent

Good Rains and Snow Cause Decline With Market Opening Under

CHICAGO, Feb. 27—(AP)—With good rains and snows reported widely distributed over the winter wheat belt, wheat prices dropped almost a cent a bushel today.

Selling was most pronounced in July contracts, which represent the 1939 crop. Traders said precipitation was very heavy in some localities and undoubtedly would be very beneficial to wheat particularly in view of the fact that the growing season is at hand. The acreage planted to wheat is considerably smaller than a year ago but crop conditions in most districts are regarded as favorable, although the latest official reports indicated moisture was inadequate in some areas.

Wheat opened about 1/4 cent lower, wiping out the advance scored late Saturday. During the next hour fluctuations were very narrow with trading slow but after Liverpool closed 1/4-1 cent down further selling appeared here, giving the market another setback from which it showed no material rally.

Wheat closed 1/4-1/2 cent lower than Saturday, May and July 18 1/4-1/2.
