Council Considers Farmers' Petition

Committee to Be Named to Study FUD Proposal for Silverton

SILVERTON—Resolutions drawn up by the Silverton Hills grange and the Central Howell Farmers Union asking that the Silverton planning council consider the forming of a public utilities power district at Silverton, were read at the council's meeting this week with President Dr. P. A. Loar instructed to appoint a committee to study the proposal.

Marion county's court again came in for some adverse discussion when the report was made that the court had said it had contacted members of the Southern Pacific company and had been "turned down" on the request of right-of-way on the Silverton end of the road.

Dr. Loar said that the railroad officials remarked here Tuesday that the first intimation they had of the controversy was when they had received the letter from the Silverton committee a few days ago. The officials also spoke favorably of the affair here Tuesday but the time element was uncertain, Dr. Loar reported.

Reports showed that the Junior Women's club was taking over the project of registration for the Silverton division of the Silver Creek recreational area; that the deed to the additional park property on the east side of Silver Creek had been signed and now awaited a "division of taxes" between the city and the county court; that letters had gone on to Rep. Mott for information concerning the proposed federal aviation schools; that investigation was progressing on the mosquito control program and city limit extension project.
