No Particular Direction Is Shown in Trends of Past Week

NEW YORK, May 13.-(AP)-Mild rallying inclinations were displayed by some stock market departments today but the list generally edged out of the week without pointing in any particular direction. Developments at home and

abroad were without any great stimulating properties. Fractional advances were plentiful at the close, as were minor declines, and numerous issues were unchanged. Many stocks failed to appear on the dragging ticker tape, Average of Week Up .3

Dealings again were among the smallest for nearly a .e. , transfers for the short session totaling 159,140 shares against 176,750 a week ago. The Associated Press average of 60 stocks finished the day unchanged at 45.8, but for the week was up 3 of a point,

Prospects that soft coal would start moving next week, after a six weeks' tie-up in this industry, provided a little cheer.

A handful of farm implement and mail order shares attracted a little interest following the senate's vote on a record propriation for agriculture and the favorable profits showing of Montgomery Ward in the quar-ter ended April 30.

Sowing Finished: Rain Is Need Now

OAK POINT - Farmers will about finish their field work this week. Corn has been sowed for ensilage. Sudan grass for summer pasture is being sowed now and a few farmers are sowing clover seed in with the Sudan grass for a crop of hay next year. Hugh Rogers finished sowing about 55 acres of alsike clover yesterday.

Nearly all spring sowed grain is up and looks good in most fields although terribly in . sed of a good soaking rain. Some fields have come up spotted due to lack of enough moisture to germinate the seed. Fall grain is badly in need of rain, although it looks good considering the dry spring. Vetch and oats and also the clover crop look good.
