Elfstrom Firm In new Store

Humphrey Joins in Firm Which Will Specialize in Floor Coverings

Culminating ten years of rapid growth and expansion, the R. L. Elfstrom company tomorrow opens in commodious new quarters at 375 Chemeketa. The move will also introduce a new type of specialty store to Salem—the Elfstrom-Humphrey company, owned jointly by Robert L. Elfstrom and James R. Humphrey, and dealing exclusively in floor coverings.

The new paint and floor covering store, said to be one of the largest and most modern stores of its type on the coast is the happy combination of two factors: 1. recognition by Humphrey of the trend toward specialized departments in the furniture business; 2. a search by Elfstrom for the right man as partner in a floor covering firm. "When Humphrey, with his years of experience and his wide acquaintance among Salem people, chose to resign as president of the Imperial Furniture company, I felt he was the right man to have as partner in a specialty store of this type," Elfstrom said, and added: "I feel very fortunate in becoming associated with a man of Humphrey's prestige and capabilities."

Keeps Pace With City
"Salem's increased growth makes a specialty store of this character imperative," Humphrey stated. He said floor covering stores throughout southern California and the east are now doing the bulk of the floor covering business. "Moreover," Humphrey said, "the ramifications of floor covering problems are such that they require specialization if the customer is to be completely satisfied and the job well done."

In launching their enterprise, Humphrey and Elfstrom perceived the importance of first securing well-known, nationally advertised carpets and linoleum, whose public acceptance was already established, and to find a capable man to take charge of installation work. From a field of over 15 applicants, William Van Gross, contractor and layer expert with a life-time of floor-covering experience to his credit in Portland department stores and elsewhere, was selected.

Familiar Lines Carried
The Elfstrom-Humphrey company will be able to supply everything in soft and hard coverings. Such nationally known lines as Armstrong linoleum and wall-coverings, Pabco linoleum, Johnsonville asphalt tiles, and Custom Craft carpets, will be featured.

Elfstrom came to Salem in 1928 and became associated with Nelson Bros., operating that concern's paint and roofing department. In 1935 he acquired proprietorship of the department, changing the name to the R. L. Elfstrom company. The business now maintains steady employment for 14 people and provides a monthly payroll of approximately \$2000.

Humphrey's experience in Salem dates back to 1923, when he was connected with the Powers Furniture company. In 1929 he acquired an interest in the Imperial Furniture company which he held until this April.

Week Is Critical In Pest Control

DALLAS—This week will be a serious one insofar as codling moths in apples and pears are concerned because the first cover spray for the control of this insect will be applied in the next few days.

A letter to apple and pear growers of Polk county giving the spray recommendations for the control of this pest were sent out to 160 growers from the county agent's office, early this week.

Arsenate of lead is the standard control recommended for this insect in the Willamette valley. The formula used is two to three pounds of arsenate of lead to 100 gallons of water. Some growers prefer substituting calcium arsenate which should be used at the rate of three pounds per 100 gallons.
