Wheat Picture Very Unsettled

Little Change in Prices Net Result of Mixed **Trade Factors**

CHICAGO, June 10-(AP)-A mixture of trade factors that had conflicting effect on price trends unsettled the wheat market today and resulted in little or no net change in quotations after an ac-

Prices dipped as much as % cent early in the day due to good rains over much of the grain belt, particularly in spring wheat territory where moisture is most bene-ficial, but then rallied about a cent. Later, evening up selling accounter for a reaction and at the close quotations were unchanged to ¼ lower compared with yesterday's finish, with July 74 % - %; September 75 1/4-1/8.

Establishment of the lowest quotations at Liverpool, Europe's principal import market, in eight years had a bearish effect but offsetting this was the slightly bullish interpretation placed by some dealers on that portion of the government crop report pertaining to spring wheat. Scattered reports of black rust infestation in parts of the southwest also attracted attention but experts who checked these said only insignificant infes-tations could be found in Kansas.

13th Oregon Ram Sale

Slated for August 18 PENDLETON, Ore., June 10-(P)-Walter Holt, Pendleton, secretary of the Oregon Wool Growers' association, announced today that the 13th annual Oregon ram sale would be held at the round-up grounds here Friday, August 18. Six hundred rams of the more popular breeds will be offered, with buyers attending from all parts of the northwest, including Montana.

Oueen Jean II Parks Among the Roses

Everything and everybody in Portland this week make way for Miss Jean Hoover, now Her Majesty, Jean II, Queen of Rosaria and ruler over the annual Portland rose festival. Dozens of engagements are on the royal schedule and from early morning until late at night the official fleet of white Ford V-8 cars is in the service of the queen and her eight princesses, each a representative of a Portland high school. Drivers are selected students from Benson Polytechnic high school. Queen Jean's car is a Ford V-8 convertible sport sedan, probably the only car which will be parked this year among the roses of famous Lambert Gardens.

Stock Traders Take Day Off

Market Deserted by All on Day of Royalty's Visit to Gotham

NEW YOFK, June 10-(AP)-The British took New York today and with it the stock market.

Traders deserted the exchange floor and boardrooms in large numbers after the opening in order to welcome King George and Queen Elizabeth on their first visit to the metropolis.

The result was that dealings slowed to a crawl near the close and final plus and minus signs, mostly fractional, were about evenly divided.

The Associated Press average of 60 issues was unchanged at 48.5, but up 1.2 points on the week. In the day's price shifts 184 stocks were up, 177 down and 162 unchanged. Transfers for the two hours amounted to 254,930 shares. Sentiment Cheerful

While speculative interest was dimmed appreciably by interest in the royal guests, market sentiment, on the whole, continued fairly optimistic. Not only was the majority of

business items on the cheerful side, but considerable optimism was evident regarding European 7.50@ 8.50 developments.

The new refinery, capable of handling 50,000 barrels of crude oil daily, cost \$5,000,000. 25-Cent Price On 'Loan' Hops

Peace hopes were strengthened Figure Based on Estimated Cost of Liquidation by Committee

> Hop markets on the Pacific oast continued to display a week ended June 7, although trading in both spot supplies and future deliveries remained of limited volume, according to economics.

The principal feature in the hop market situation during the the stabilization committee of the trade of 25 cents per pound on those stocks. This price is based upon the estimated cost of liquidating the loans in full, plus all carrying charges,

Oregon markets were quiet and inactive during the past seven days, with trade reports indicating no sales of hops in the spot market and no new contracts for 1939 crop hops for future delivery reported written by growers in this state. Demand was slow from both domestic and foreign buyers. The steadying influence in the spot schools. growers on 1939 crop hops for delivery this fall, tended to strengthen the market on new crop supplies.

The market on 1939 crop hops was reported around 21 cents per pound net growers, but offerings were light. No interest was shown in 1937 hops and prices remained only nominal. Trade reports continued to indicate that the growing crop in Oregon yards was making generally favorable progress.

Washington markets developed some activity in the Yakima valley district during the past week. One small lot of 17 bales of 1938 crop hops were reported sold in that area at 25 1/4 cents per pound, net grower. Contracts covering 375 bales of 1939 crop hops were reported contracted by Yakima valley growers at 22 1/2 cents per pound, with an additional 100 bales contracted at 22 cents per pound, net growers. These contracts covered regular type seeded hops.

California hop markets remained dull but maintained a firm tone. An important market development was the diversion of 1938 crop supplies to a pool following the maturing of governmental loans at June 1. These stocks were being offered to the trade at 25 cents per pound with scattered lots taken by domestic dealers and industries. No other 1939 hops are now owned by California growers except those under growerdealers control. Producers re-ported scattered sales of 1937 hops at 5 cents per pound but most remaining supplies were being held for higher prices.

Around 150 bales of 1939 hops were contracted at 22 cents per pound, net Sonoma county grower, but light offerings tended to restrict further trading. With an unusually large portion of the 1939 crop already under contract, most growers were unwilling to make further commitments pending receipt of marketing allotments.
