# Trade Deadlock

Fluctuations Are Widest in Years; Trade Is Orderly, Brisk

CHICAGO, Sept. 7 .- (AP)-Despite heavy profit taking which caused a temporary grain market relapse, the war boom in grain prices continued today.

Breaking of the recent trading deadlock resulted in the largest business and the widest and most rapid price fluctuations in years. Millions of bushels of grains

changed hands. Directors of the board of trade doubled the limits for daily price fluctuations, thus removing the bridle that has checked market action since Friday. At the same time, however, they ordered sharp increases in margin requirements in an effort to keep unruly speculative activity out of the market. The result was an orderly but extremely brisk trade with heavy dealings by milling, export and other commercial interests whose activities have been throttled by the recent market tie-up.

Profits Taken Early. Wheat tumbled as much as 4 % in the early rush to take profits accruing as a result of almost 20 cents advance in four sessions. commercial buying absorbed much of this selling, however, and after midsession there was a sharp rise with prices advancing 6 to almost 8 cents a bushel from early lows to the best levels since March, 1938. Wheat closed 11/4-21/4 higher than yesterday, September 88 14 - 14, December 88-

Some of the selling in wheat was associated with the increased margin and removal of Argentine minimum prices as well as reports of efforts to conciliate the warring nations in Europe. The Canadian wheat board was reported selling and export business in Canadian wheat was estimated at 500,000 bushels. Cables reported the United Kingdom has bought more than 10,000,000 bushels of Argentine grain the last few days.

The break in the deadlock in trade touched off a big business in cash grain. Shippers sold bushels of wheat and 212,000 bushels of corn. The country sold 111,000 bushels of wheat sold as high as 921/2 here while white corn reached 6814.

Heavy profit taking occurred in the provisions trade but lard held on to much of the gains of 55 to 68 cents.

# Change in Pound Dealing Advised

NEW YORK, Sept. 7-(AP)-The New York foreign exchange committee today announced it is recommending to the money market that because of delays in cable transmission, beginning next Monday the British pound sterling be dealt in here on the basis of payment in New York and Great Britain on the second New York business day after the trade is made.

The action brings sterling in line with all other principal European currencies, in which settlements for many years have been made on the second succeeding business day.

The committee, headed by R. F. Loree, vice-president of Guaranty Trust company, was formed recently to handle any problems in foreign exchange markets arising out of the war situation in

Final Hour Profit Taking Cuts Advances, Turns Some Into Declines

NEW YORK, Sept. 7.-(AP)-The stock market moved shead briskly at times today but final hour profit taking cut many advances and turned others into declines.

Prices started up from the beginning, gained momentum, then slipped toward midday. Another burst of buying followed but it failed to hold through the latter part of the session when offerings were fairly heavy. Volume was far over that of

the past two days, with transfers totaling 1,597,280 shares with 3,942,840 yesterday. The Associated Press average of 60 representative stocks added .1 of a point at 50 2

Brokers noted that today's buyers were inclined to break away from the purely war benefit stocks and chose as well those likely to be aided by business recovery in this country. The theory was that many of these had been at about present levels earlier in the year when it was thought industrial activity would not suffer any spring lag. The lag came, but summer production was better than had been expected normally.

Somewhat less intense today than on Tuesday and Wednesday but a persistent demand continued. Buyers were showing an increased resistance to the advanced asking prices. Late sales, however, were closed at sidvanced prices. Graded average French combing length fine territory wool has realized 85 cents, accoured basis, and the same price has been paid for good French combing lengths of similar wools in original bags. Bids of 80 cents, scoured basis, have been received on average to short French combing fine original territory wools. Prices in the range, 38 to 40 cents, grease basis, have been paid for graded combing three-eighths and quarter blood bright fleece wools.
