"Crops were good; fence posts around the farms were painted; an general air of better times was evident. The trade centers seemed active; people were buying; and while I wouldn't say that business was flourishing, conditions looked favorable. Western North Dakota and eastern Montana are literally a waste, and looked deserted like the old Bad Lands. Parts of the Red River valley had good crops and livestock looked fine."

### Common Sense About Constipation

A doctor would tell you that the best thing to do with constipation is get at its cause. That way you don't have to endure it first and try to cure it afterward—you can avoid having it.

Chances are you won't have to look far for the cause if you eat the super-refined foods most people do. Most likely you don't get enough "bulk!" And "bulk!" doesn't mean a lot of food. It means a kind of food that isn't consumed in the body, but leaves a soft "bulky" mass in the intestines.

If this is what you lack, fry crisp crunchy Kellogg's All-Bran for breakfast. It contains just the "bulk" you need.

Eat All-Bran every day, drink plenty of water, and "Join the Regulars." Made by Kellogg's in Battle Creek. Sold by every grocer.
