Education: Formula for Security

You could have heard a pin drop during any one of the pauses in Father Alcuin's address at the Salem chamber of the Library of Congress, writes: commerce on Monday; and after he had finished and the applause had ended, the Methodist minister sitting next to The great-grandfather, Jedidiah Lee, Statesman reporter said "Very good" in a tone which expressed more than the words.

For more than a year we have been expectantly waiting diah Strong, David Lee's stepfafor someone in a secular gathering or a secular publication to ther. voice the thought touched upon by the Mt. Angel churchman; that the dictators of Europe would sometime be halted. Strong' (Smith) might indeed inman; that the dictators of Europe would sometime be halted. dicate a relationship between Ja"if not otherwise, by the avenging hand of God." It seems odd that so few moderns put their trust in divine world guidance. Smith." There is also a possibili-It scarcely requires a formal religious faith, but rather a mere ty that Joseph Smith, founder of belief in an orderly world controlled by inflexible natural the Mormon church, was related laws, to foresee an inevitable retribution for the handful of to Lee and Smith, as indicated in men who have made a shambles of Europe.

who have made a shambles of Europe.

rather its principles and ideals. To Father Alcuin, that im- who had been in the country plies Christian education. But how can education save a nation from its external enemies? For much of Europe, that may still be an unanswered question. But for the United States, Abraham Lincoln

answered it more than 100 years ago, long before he had attained fame. At Springfield, Ill., January 27, 1837, in his first (Oregon), looking for a route out important address Lincoln said: "At what point shall we expect the approach of danger? Shall we expect some transatiantic military giant to step the

ocean and crush us at a blow? Never! All the armies of Europe, Asia and Africa combined, with all the treasure of the earth (our own excepted) in their military chest, with a Bonaparte for a commander, could not by force take a drink from the Ohio or make a track on the Blue Ridge. . . .

"At what point, then, is the approach of danger to be expected? I answer, if it ever reach us it must spring up amongst us; it cannot come from abroad. If destruction be our lot we must ourselves be its author and finisher. As a nation of freemen we must live through all time, or die by suicide

Bureaucracy, Unlimited

"Will you kindly inform me how many, and the names of all the governmental setups that have been enacted into national

Thus inquires R. D. Turpin of Mill City, who has been a Bay company's employ. Sullivan's frequent contributor to the Safety Valve column and is an books support the traditions that avid student of political and economic problems. It would the amount of money paid by Dr. take a lot of research to answer his question with complete accuracy, because some of the governmental agencies to which he refers have been shelished and liquidated not metal agencies. It would be made and dot hamburger."

McLoughlin to Jedidiah Smith for his recovered furs and other property, from the Umpqua In"Aw, we'll which he refers have been abolished and liquidated—not dians, was far less than \$32,000, many, we'll grant, because once you get a governmental bu- represented in the London draft. reau established it's extremely difficult to get rid of it. The Bay company, to be published at NRA (National Recovery Administration) is one that comes some future date, may clear up they did, he wondered. Money to mind. More than that, our list cannot be complete because this matter, or may not. dates when some of the agencies were created are not given in the directory of governmental bureaus, so for safety we'll omit some of the doubtful, minor ones. First we'll list the prin- phy of Jedidiah Smith by Sullicipal alphabetical agencies:

AAA -Agricultural Adjustment Administration. FSA-Farm Security Administration. FERA-Federal Emergency Relief Administration. FHA-Federal Housing Administration. PWA-Federal Emergency Administration of Public Works. NYA-National Youth Administration. REA-Rural Electrification Administration. WPA-Works Progress Administration. TVA-Tennessee Valley Authority. NLRB-National Labor Relations Board.

CCC-Civilian Conservation Corps. -Securities and Exchange Commission. HOLC-Home Owners Loan Corporation. RFC-Reconstruction Finance Corporation.

It should be mentioned that the RFC was created under the Hoover administration. There is an additional list of agencies not so readily identified by their initials, including:

Commodity Exchange Administration. Federal Crop Insurance Corporation. Federal Surplus Commodity Corporation. Electric Home and Farm Authority. Federal Home Loan Bank Board. Commodity Credit Corporation. Federal Deposit Insurance Corporation. Maritime Labor Board. Expert-Import Bank, National Power Policy Commission.

Wage and Hour Division.

Those two lists, still incomplete, when bunched together may look rather imposing. As a matter of fact, while it's a lit- about seven months younger than ticket on a 100 to 1 shots nose and tle difficult to define just what constitutes a governmental the Dictionary of American Biogbureau, by conservative count there were at least 231 of them raphy estimated him. WHAT ABOUT GOLD? Have gold miners ever wondered what it would be like if the world should decide suddenly that gold is a pretty poor material to use for money, after all? For that matter, have all of us ever given that possibility the thought it deserves?

If the world took that step, it would only be following the lead of America, you know. America has made it a crime for Americans to use gold for money. Americans had to turn their gold over to the government, which buried "Strained his back when he still money over the world at large. But it is not money to any individual American.

> Now suppose the rest of the world decided our underground gold doesn't mean much to anybody but Americans. The rest of the world could then settle international trade balances by bookkeeping and the Nazi type of barter system. And where, then, would we be?

We would be sitting on top of a heap of gold that might find some useful purpose replacing copper for Bonneville transmission wires, perhaps, but would be of little more value than lead or zinc for much else.

What condition might possibly lead the other nations of the world to take such a step? Loss of their own gold, no loubt. No use maintaining an artificial value on something they wouldn't have.

And what might cause other nations to lose all their gold, and America to gain it? War, of course, and America making and shipping things of

value to the nations, demanding in heir gold under a mis-n: sh and carry" plan. Is this what ... are unknowing-

ly preparing for as we get ready to go into the business of sending our useful and badly-needed natural resources, food and manufactures overseas? Is this what we should expect during the time that we ourselves are paying more for the necessities of life because so many of the necessities will be feeding troops in France or the fishes at the bottom of the sea? We don't know. We only know that this possibility is at the very least somewhat more than a pipe dream. We also can guess that if it happened, it might very well "Goodbye, America, Hello, Stalin" for us.
