Salem Market Quotations Stock Leaders Gain 2 Points

Proceedings Are Erratic; Buying Follows Early Hesitancy

NEW YORK, Nov. 2.-(P)-The stock market today ran the gamut of profit selling and speculative buying and ended with gains run-ning to 2 or more points for leaders.

Liquidation soon dried up and, in the afternoon, following word the house-senate conference committee had approved the administration's neutrality measure, and that the bill would go to the president for signature by tomorrow at least, a recovery move got under way that put the aviations and steels well out in front for closings near the day's tops. Curtiss-Wright, one of the liveliest performers of the session, opened on a block of 20,000

over in large amounts without tacking on spectacular advances. Average Is Up The net result of the day's erratic proceedings was that the Associated Press average of 60 stocks was up .5 of a point at 52.8, the first gain since October 25. Transfers totalled 1,815,860 shares against 845,710 the day

Part of the early hesitancy was attributed to the belief that, while foreign orders for war materials in America of around \$1,000,-000,000 are likely, the allies may cut down purchases of many other articles here sufficiently to offset much of the buying. At the same time some stimulation was seen in reports orders of some \$159,000,000 for planes were ready for immediate placement in the hands of manufacturers.
