"The Finns were driven back with losses to Finnish territory by Soviet troops.

Governors Hold Education Club

Veto Power on Spending Bills Held Vital to School Systems

WASHINGTON, Nov. 30-(AP)—The governors of Utah, Idaho, Oregon and Washington possess a potent instrument of control over state educational institutions through power to veto separate items in appropriations bills, the office of education said today in a summary of higher educational institutions in the scheme of state government.

The review, which discussed reorganizations in state governments, said "It is fairly evident that a strong trend exists among the states toward centralization of authority in the governor as supreme head of the executive branch of the government."

"Governor boards of state universities and colleges are being brought under the jurisdiction of the governor and other executive officials. The legal status of the boards which gave them a detached position in the state governmental organization and which endowed them with autonomy over management of the institutions is being altered in a number of states."

The summary said the governors of all states except North Carolina have power to approve or veto bills passed by the legislature.

French Premier Gets New Power

Confidence Vote Is Given Daladier in Two Vital Wartime Questions

By JOHN MARTIN PARIS, Nov. 30-(AP)—Premier Daladier won decisively tonight an extension of his decree powers to rule France for the duration of the war with Germany.

The final vote of confidence in his government by the chamber of deputies was 318 to 175. Overriding socialist opposition, Daladier twice staked the life of his government in swift parliamentary moves.

He agreed to call parliament every month to ratify his decrees. If parliament happened to be in session. Otherwise, he refused.

"Democrats find themselves in the presence of other regimes," he said, "which can act rapidly and in secret."

"I cannot continue my task unless the powers I ask are voted."

On the final vote and on an earlier finance committee amendment which sought to force him to summon parliament every month regardless of whether it was in session, Daladier staked the life of his government and won both times.

The debate was carried on behind chamber windows blacked out against the possibility of air raids.
