#### Progressive Philosophy of Hope

Unemployment and distress still prevail in the land and so, in effect said Governor Culbert Olson of California in his and declined the nomination for Portland address Saturday night, the nation still needs President Roosevelt at the helm. The illoric of his argument, when et it is stated thus succinctly, needs no further exposition. Roosevelt has had seven years to correct this condition. Now he apparently has given it up, attracted by the opportunity to try out his theories on the whole round world.

Meanwhile the republican program committee headed by Glenn Frank comes forward with its analysis of national conditions. It is not a platform-the drafting of that document is left to the national convention. It is an outline of suggestions from which the platform committee may work, carefully compiled after two years of study. It is a lengthy document covering all phases of the rational problem, but there is the heart of it, condensing both the negative phase—the unsatisfactory condition-and the positive phase-the possible remedy:

The primary reason for the economic failure of the New Deal goes beyond detailed errors in legislation, administration and the selection of federal personnel. It lies in the fact that the New Deal leadership has almost completely misunderstood economic

The economic program of the New Deal, despite sporadic reversals of policy, has rested essentially on the control of production, the creation of scarcity, and the boosting of prices. At the turn of the century, this was the precise program of the least enlightened leadership of big business.

Liberalism fought this program then. But, by some strange twist of thinking, these policies which were attacked as reactionary and as a threat to the well-being of the people, when followed by big business then, are defined by the New Deal leadership as liberal and as essential instruments of social progress, when followed by big Government now. We are, as a result, again faced with the problem of unduly centralized political power.

The New Deal philosophy of restricting production and raising prices is bound to operate as a brake on the revival and expansion of enterprise under a high-powered system. This should have been obvious from the beginning. Now the New Deal record puts it beyond dispute.

No leadership can produce a movement of hope if it begins with the assumption that the clock of the national economy is running down, that its mechanism has become so faulty that it can be kept going only if continuously run by hand-the hand of the Federal Government.

And no leadership, believing this, could be expected to do other than the New Deal leadership has done, namely, to turn its attention to redistributing the fruits of existing enterprise rather than to ways and means of expanding the nation's enterprise. Under such philosophy and such policies, each economic groupbusiness, labor, agriculture, and so on-must, in self-defense, go after a larger and larger share of less and less. This cannot but mean, in the end, a stagnation of the nation's enterprise and diminished well-being for all these groups of producing Americans.

Now for the positive approach:

The committee is convinced, not by wishful thinking or blind optimism, but by the facts it has assembled and analyzed, that American enterprise can expand more, offer more investment opportunities for savings, provide more jobs for workers in factories and on farms, and create more profitable outlets for the energies of the people generally in the next 25 in the 25 years before 1929, if too many hurdles are not thrown in its path by either the public policies of government or the private policies of business. . .

The program committee's soundings of party opinion indicates that republicans believe. . . full employment can be accomplished only through the sustained expansion of the normal enterprise of the American people. . .

The committee's soundings. . . further reveal that republicans believe the imperative prerequisite of such expansion lies in revitalizing the American combination of political liberty and private enterprise which has produced and distributed more material benefits for more people in a shorter time than any other

The starting point of sound economic policy for the nation at this particular juncture is, therefore, a fact-based realization that the private economy of America has not come to a dead end, has not been stricken with creeping paralysis, but is crowded with possibilities of fruitful growth and profitable expansion, and that these possibilities will be more surely and quickly realized under a regime that accords to men the largest freedom in their enterprises consistent with the safeguarding and serving of the

There is much more in the committee's report, and some details will become controversial before the national conven- was my stepmother, was their tion opens in Philadelphia June 24. But the portion quoted grandmother! Also, my wife was above is the kernel of the report and of the program and it not only the aunt of my father's cannot be controversial within the republican party; it will children—by his second wife—but was their sister-in-law as have to stand substantially as it is. The party will have to well, stand upon it. That is its analysis of the problem, and that is fts solution. What is more to the point, the nation will have to stand or fall depending upon whether that solution is sound nearer than any other member and adequate. No other solution has been offered. All that the and even she was the niece of new deal has to offer is four more years of "the same."

Even if the republican solution is sound, at this point it mother was her grandmother's may no longer be adequate. The new deal has gotten us into a deep hole. Getting out, even with the right formula, is going to be tough. But the republicans do offer a formula. It is ernor's first wife was Nancy a formula based upon hope. And it does offer hope.

#### Move on Propaganda

So much has been said on the subject of propaganda in news-so much, indeed, as almost to outbulk the news hotly suspected of propaganda itself-that at this writing any further observations would seem unnecessary if not outright inapropos. Yet having said that by way of introduction we are nothing loath to cite an article which follows, from the editorial columns of the New York Herald-Tribune, as one of the best statements of the position of the reader and interpreter of European news which we have yet run across.

It deals primarily with the difficulty of interpreting events in southeastern Europe when scraps of rumor about potential Russian collapse, the beginning of "something big" in March or April in the Near East, and of discord between Italy and the Allies are the only bits of evidence on which to form an opinion. It says:

Unfortunately, the signs no longer really mean anything. Now that press reports and opinions are turned on and off, in most countries, by the pull of a lever and for the most obscure reasons, their evidential value becomes almost nil; and now that every slightest move is calculated for its effect, the moves are rapidly ceasing to have any intelligible effect at all. The observer finds himself back in the parable of Plato's cave. We sit with our backs to the sunlight of reality, watching the succession of shadows cast by propaganda barrages, by inspired news releases and even more carefully inspired suppressions, by the comings and goings of diplomatists, by mysterious troop movements. And from these shadows we attempt to deduce some idea of what is really going on outside. It is confusing; and one seldom feels much confidence in the accuracy of the result.

Nor are matters greatly helped by the fact that there are so many shrewd and expert deducers inside the cave. Through its press and radio the American public has at its service a large corps of quick and highly trained minds whose duty it is to draw useful inference from these grossly inadequate data. The result is the usual one when ingenious reason is applied to an insufficient body of fact. Not only are there all sorts of wildly contradictory inferences, but the facts themselves begin to get confused in the metaphysical constructions erected upon them. We are in constant danger of knowing too much that isn't so. As for the Near Eastern front one can but assemble the available shadows -what the Turkish press is saying, what the Italian press is saying, the ostentation with which the Allies have all at once begun to talk about their Near Eastern armies, the story that Italy is about to annex Hungary, the rumor that Mr. Sumner Welles may have a reason for going first to Rome in his mysterious mission, the undoubted difficulties being experienced by the Russians, the Rumanian call to the colors. Perhaps one is safe in ng from them that there must be a great deal of active horse trading going on somewhere. But can one safely deduce for them the title of the "Flying the lace cloth and the silver and known.

## Bits for **Breakfast**

Dunham Wright, Oregon 2-21-40 pioneer, second cousin of Abraham Lincoln, will be 100 years old the 13th day of March:

By R. J. HENDRICKS

(Continuing from yesterday:) 'Mr. Wright had been a democrat, but a Jeffersonian democrat, and of independent mind and action. In 1892, when he believed the leaders of his party had departed from Jeffersonian principles, he worked for the people's party-the populistsand was offered by that party supreme judge, but ran for the state senate on the populist tick-

"Dunham Wright was from the first a friend of the Indians, who were his most numerous neighbors in pioneer days, and this friendship was returned in

"In his address to the joint session of the legislature, Dunham Wright spoke of his first boarding place in Salem, along with several other members who served in the 1872 legislature, and were accomodated with clean rooms and good meals at \$6 a week each.

"He said a Mrs. Wright was their landlady, and that her place was near the old woolen mill.

"He explained later, to the writer, that she was a sprightly and competent woman, and that her husband was about 20 years her senior. "One finds this line in the 1871 Salem Directory.

"'Wright, J., sr., res Liberty between Division and Fir.' "In the 1874 Salem Directory s found this line:

'Wright, Mrs. A., widow, res Liberty bet Division and Fir.' "It is evident that this was the boarding place of a few of the 1872 legislators, Dunham Wright among them, and that beween that year and 1874 her husband, J. Wright, died.

"Fir street was a short thoroughfare between Commercial and Liberty streets, and at a later time it was closed up. So the Wright boarding house was evidently on the west side of North Liberty street.

"If any one can tell the writer more about J. and Mrs. Wright, and their boarding house, he would be pleased to have this information." (The answer will be found further along in this
