"Now that's what I call good coffee"

How pleasant it is, after the breakfast rush is over and you are washing the dishes, to recall what your husband said when he took the first sip of his morning coffee... "NOW THAT'S WHAT I CALL GOOD COFFEE!"

It's easy to learn how to make good coffee

No magic touch is required. Just remember to use Hills Bros. Coffee and brew it with care. The results will delight you, for the quality of Hills Bros. Coffee is something you can always rely on. This uniform goodness produces the utmost in flavor and aroma in the cup.

IMPORTANT: Carefully observe timing for each method. Measure 2 level tablespoons of coffee to each cup of water. Use water slightly for exact strength desired. Keep coffee-maker clean.

DEEP METHOD: 6 to 8 minutes preferred. If less than 2/3 capacity is made, water will drip too fast, giving weak coffee.

GLASS VACUUM-MAKER: Put upper bowl on after water boils. The coffee and water should be in contact 5 to 7 minutes.

PERCOLATOR: Start with cold or hot water. Percolate slowly 7 to 10 minutes after steady pumping starts.

COFFEE-POT: Bring coffee to boiling. Stir. Remove from fire. Add a little cold water and let stand 5 minutes to settle.

STOVE-POP: Pour boiling water on coffee. Stir well. Stir again in 5 minutes. Steep for a total of 10 to 15 minutes.
