

AAUW Members Hear Speaker

Members of the American Association of University Women heard Miss Edna Van Horn, of the household administrative staff of Oregon State college home economics department, at the meeting of the organization held on Saturday afternoon at the Marion hotel.

Miss Van Horn discussed the findings of the consumer-purchase survey which was completed recently. The purpose of the survey, for which congress appropriated \$710,000 in 1935, was to ascertain the income and expenditures of Americans. Congress' interest came in the study of farm homes and their incomes. Thirty million persons came under the general study but a smaller number of families were questioned in detail. The survey, Miss Van Horn said, is representative of all non-feral families of native born whites including man, wife and one child. The minute survey dealt only with unbroken families.

It was found, upon examining statistics, according to Miss Van Horn, that only 10 per cent of the families of the country earn between \$2500 and \$5000 and only 1 per cent up to \$10,000. A \$1500 a year family is in the top third.

It was found also, says Miss Van Horn, that income is more of a factor in living standards than in other things. Families earning less than the \$1500 work on a deficit and "can't make ends meet." It was a curious fact, said the speaker, that this deficit is met easier in larger cities than in small ones.

Oregon's ratio for living is higher than in most other states. Families can live within an income of \$1250 and farmers on \$1000. Pacific coast families are better fed.

Also on the Pacific coast it was found that families spend more for food than any other item, next for a car, third for housing and fourth for operating and clothing. Eighty eight per cent of the families on the coast own cars.

The HAPPY KITCHEN

Do you cook by mathematics or by calisthenics? Calisthenics are fine in their place, but the place isn't in the kitchen. It's much easier to cook by a recipe of one part mathematics, two parts ingenuity, and a large-sized portion of fun and adventure.

There's really no need at all for back-breaking drudgery in this modern day and age. There are undiscovered worlds of new things to make, new ways to make the old dishes better, "hurry-up" time-savers and wife-savers, and hosts of short-cuts to meals more delicious than Epicurus ever dreamed. And they're all so easy and so simple—you don't have to spend the whole family budget or even a very big slice of it for them. You'll wonder, when you hear them, how in the world you've missed thinking of these joyous aids to happier meals before this.

If you want to hear about the latest fashions in foods, and the way to make them with less work and more fun, we have a treat in store for you—our FREE Cooking School. It has been arranged by practical experts on cookery—and it will be crammed full of suggestions to brighten your kitchen for a whole year.
