

Spy Fighting Change Asked

President Asks Justice Department Be Given Alien Control

WASHINGTON, May 23.—(AP)—In a reorganization message a week ago, President Roosevelt sent congress Wednesday plan to shift the immigration and naturalization service from the labor to the justice department so that authorities may "deal quickly" with spies and saboteurs.

from the country and to deport any now here, along with aliens whom police certify to be revolutionary agitators.

The president said he had not planned to submit another reorganization plan at this session but that "the startling sequence of international events which has occurred since then has necessitated a review of the measures required for the nation's safety" and that "this has revealed a pressing need" for the transfer.

"Much can be said for the retention of these functions in the department of labor during normal times," the message continued. "I am convinced, however, that under existing conditions the immigration and naturalization activities can best contribute to the national well-being only if they are closely integrated with the activities of the department of justice."

The step is aimed at "those aliens who conduct themselves in a manner that conflicts with the public interest," the message said, but "does not reflect any intention to deprive them (aliens generally) of their civil liberties or otherwise to impair their legal status."

Flight Training To Start for 10

Twenty seven aviation enthusiasts who have been taking ground school training at the Salem airport under the CAA civilian aeronautics training program will take examinations soon, possibly this week, to determine which ten will be "graduated" into actual flight training.

The ten receiving the highest grade in the examination will go on from ground school to plane operation. The examination questions are expected this week and flight training will start as soon as they are checked and graded, possibly by June 1.

Vern DeArment is instructor for the group.

Nominations Made By Salem Lions

Salem Lions club members yesterday nominated Dr. Carl W. Emmons, Ronald E. Jones and George A. Rhoten for the presidency of the organization. The annual election will be held June 6.

Other nominees are: First vice-president, James Cooke, Virgil T. Golden and Lloyd A. Lee; second vice-president, Walter R. Dry, R. W. "Joe" Land and Ed Schrader; third vice-president, Dr. Estill Brunk, Edward Majek and Roy Houser; directors, two to be elected, Wayne Doughton, J. Fuhrer, Fred Keizer, Jack Putnam, Dr. W. D. Snodgrass and Dr. Waldo Zeller.

Objections Voiced To Proposed Cabs

Council License Committee to Take Application Under Advisement

No intention of usurping privileges granted companies now operating was expressed as the attitude of the Economy Cab company, Inc., which seeks licenses for a fleet of 12 taxicabs, at a hearing before the city council license committee Wednesday night.

W. W. McKinney, appearing for the cab company, said the proposed cab service would provide rides for a ten cent fare within certain zones. He cited successful operation of such a plan in several southern states.

R. W. Lemmon, president of Oregon Motor Stages, operators of the city bus lines, told the committee the service outlined by the new organization "would be destructive" to his company's business.

Troy Wood of the Salem Taxicab company also raised objections to the new venture.

The license application was taken under advisement by the committee.

Harvest of Peas May Be Doubled

PORTLAND, May 23.—(AP)—Oregon growers may harvest 70,000 acres of Austrian winter peas for seed this year, compared with 33,500 acres in 1939, an agriculture department survey indicated today.

Western Oregon showed a general increase, particularly in Clackamas, Marion and Yamhill counties. Conditions are about 78 per cent of normal because of stem rot and aphids.

The state's hairy vetch harvest will be about 65,000 acres against 37,000 acres a year ago. Common vetch cut for seed is up about 25 per cent and Hungarian vetch 15 per cent.

Additional seed production acreage has been planted in various types of ryegrass.

Youth Enlists in Training School

PORTLAND, May 23.—(AP)—The Portland recruiting office announced today that 17 Oregon men accepted by army traveling flying cadet examining board last month had enlisted and been sent to training schools.

Those sent to the Cal-Aero Training corporation at Glendale, Calif., included Paul B. Smyth, Tryson R. Bailey, Robert M. Madison, all of Corvallis, and Henry D. Frants, Salem.

Those assigned to the Allan Hancock college of aeronautics at Santa Maria, Calif., include Joseph A. Ravis, Jr. and Robert W. Robinson, Corvallis.

College ROTC Men Given Commissions

CORVALLIS, May 23.—(AP)—Twenty-one special awards and 103 second lieutenant's commissions in the US army reserves were distributed to Oregon State college reserve officers' training corps members today.

Commissions included: Field artillery—Fred Dahl, Milverton; Henry Pavelek, Woodburn; Charles Warren, Salem.

Corps of engineers—Victor Clay, Harrisburg; Herbert Glasner, Salem.

Freed Quickly

Martha Raye I. I. N. Phonophoto

Comedienne Martha Raye wears a woe-begone expression in Los Angeles court as she testifies in her suit for divorce from her second husband, David Rose, composer and arranger. She was given her freedom after three minutes on the stand. The charge was cruelty.

Public Is Invited To Look at Stars

B. L. Bradley Will Open Observatory, 8 to 10, Wednesday Nights

B. L. Bradley, local amateur astronomer, will open his observatory on Waldo avenue to the public without charge Wednesday nights from 8 until 10 o'clock through the months of June, July and August, he announced yesterday.

Brightest point in the heavens at the present time is Venus, visible after sunset in the western sky. Venus on May 20, Bradley

says, reached a point in her orbit around the sun where she appears at the greatest brilliancy and is even bright enough to be seen in the daytime without optical aid if one knows where to look.

Venus' average distance from the sun is 67,300,000 miles, much less than the earth's and therefore it receives about twice as much heat from the sun as the earth does. Venus has a surface area about 91 per cent that of the earth.

It takes Venus 224.7 days to complete one trip around the sun, thus a year on Venus is 224.7 of our days on earth.

The location of the Bradley observatory is out South Commercial street to Waldo avenue, then east on Waldo about one city block.

Williams Rites: Friday

PORTLAND, May 23.—(AP)—The body of Ralph E. Williams, senior vice-chairman of the republican national committee, was returned to Oregon today for funeral services Friday at 3:30 p.m. The veteran republican leader died in Philadelphia last Thursday.

NEW FAST GRANULAR YEAST

Works in a Hurry—Needs No Refrigeration!

DID you ever hear of a dry baking yeast that's fast and holds its fermenting power for days on your pantry shelf, without any help from an ice box? Maybe you've long yearned for such a baking yeast; if so, it's here and you now can go to your grocer and ask for MACA.

It's new and different, and it's just as simple and easy to use as any ordinary wet yeast. There's nothing new to learn, no new tricks to try. When you're ready to bake, just stir MACA in a cup of lukewarm water and for the rest of the routine follow your favorite straight dough method and you should have successful results.

One woman wrote us: "MACA is the first new big idea in home baking that I've come across in 34 years experience. My friends and I have at last found what we've been looking and hoping for these many moons." This possibly expresses the unspoken thought of many, many housewives, judged by the great and increasing demand for MACA wherever it is introduced.

Try MACA today. You'll like it better, we'll guess, than any other yeast you ever used.

Very Important

CLOSED SUNDAYS

For the past several years Salem shoppers have been very happy and satisfied with the service we have extended them in six shopping days a week. We believe it only fair to ourselves and our employees to relax on Sundays. Aside from that, most of our employees enjoy going to church on Sundays. WE DON'T FEEL JUSTIFIED IN DENYING THEM THIS PRIVILEGE which we would to a certain extent be compelled to do, by remaining open on Sundays. This is a FREE COUNTRY, so why not be free . . . at least on Sundays, as is the largest per cent of the population of our great nation!
