### Smoother Shoulders Mark New Fur Coats

Left, beaver daytime coat; center, red fox three-quarters model; right, wrist-length white fox-length model.

The main difference between last year's models and the new fur coats is in the cut of the shoulders, which is smoother without last year's puffiness. At the left is Fay Wray wearing a street-length coat in beaver with back fullness introduced on the yoke and small standup collar. Lucille Ball, center, has chosen a red fox three-quarter-length coat, and Virginia Vale, right, shows a wrist-length white fox-length model, which is ideal both for evening and dressy afternoon parties.

## Are You a Hit-and-run Shopper?

Hit-and-run drivers are known as a national menace. Hit-and-run shoppers are almost as dangerous—but only to themselves!

Hit-and-run shoppers act on impulse, without plan or purpose. They rush through miles of aisles, pause, pass on, back-track and buy.

They pay too much and get too little. They waste time and squander energy. And a lot of their pointless purchases wind up in a dark closet with the rest of the family skeletons!

Smarter, shrewder shoppers chart their shopping trips in advance—in the advertising pages of *The Statesman*. They compare products, prices, values. They learn exactly where to find what they want. Then they go and get it.

Read the advertisements regularly. It's a simple system. But it saves time, temper, tramping. And it makes every dollar do double duty!
