### Lebanon Schools Plan Bigger Year

#### Three Teachers Added to Faculty; Bus Will Haul Primary Pupils

LEBANON—Lebanon schools will reopen Monday with three more teachers than last year, 33 instead of 30 and an increased enrollment of students, it is expected. Most of the high school students registered Thursday and Friday.

This year all of the grade work will be carried on in the south building, the class rooms in the high school gymnasium being reserved for the junior high school so that only the high school students will use the main building.

Bus transportation for first and second grade pupils will be arranged from the first and it is possible that transportation may be furnished pupils of the other grades later on. The bus going to the south school will leave the high school gymnasium at 8:45 a.m.

The addition to the south school is completed except for some painting. This may make it possible to hold classes in the play room for a few days. Both buildings have been renovated inside and the outside woodwork has been repainted.

Superintendent Milton E. Coe has announced the faculty as follows: high school, Irvin P. Bryan, principal; Mrs. Theda Binschader, Kee Buchanan, Vernita Coon, Peter D'Alfonso, Ruth Ender, Mrs. Viola Fallier, Marian Farrell, Ira H. Forrey, Howard Hickcox, Alice Holmback, Barbara Kurts, Thomas Landies, Lawrence Page, Mignon Phipps, Dorothy Schiltz, LeRoy Scott, Mrs. Edith Shanks, Jack Woodward and Albert Simons.

South school, Ernest Caldwell, principal; Leo Blodgett, Mrs. Betty Cox, Iris Cutsforth, Dorothy Gerlach, Virginia Hall, Mrs. Dorothy Joslin, Florence Matejcek, Gladys Medler, Elsie Rea, Mrs. Vera Slawson, Georgia Weirich and Ruth Wright.

LABISH CENTER—Mr. and Mrs. Harlan Pearsall were called to Billings, Mont., early this week, where Mr. Pearsall's mother suffered a paralytic stroke. Her condition is reported as serious.

### Pontiac Begins Fall Showing of New, Streamlined Torpedo Fleet

Spurred on by the remarkable success of its new and original torpedo models in 1940 and with its factory and dealer organization geared up to surpass its most successful year, Pontiac motor division today is announcing an entire Torpedo fleet for 1941.

There will be three complete lines of cars styled in the Torpedo manner—longer in wheelbase, more graceful, roomier, more powerful—a low-priced DeLuxe Torpedo of 119 inch wheelbase; a new Streamliner Torpedo of 122 inch wheelbase and a Custom Torpedo of the same wheelbase.

They will replace the shorter wheelbased Special Six, DeLuxe Eight and Torpedo Eight of 1940. Unusual skill and finesse has been shown by Pontiac engineers in providing all 1941 models with either a six cylinder or an eight cylinder engine.

available in four-door sedan, sedan-coupe and station wagon. Overall length of passenger car models is 211 1/2 inches, of station wagon 213 1/2.

Eight colors with fender and wheel striping to harmonize are available with an additional six two-tone combinations at slight extra cost.

Canada cloth, corded wool-cloth, two-tone worsteds are available on closed models with leather or cloth for the convertible sedan-coupe.

Although radiators, hoods, fenders, other sheet metal parts and Fisher bodies have been re-styled to further glorify the Torpedo design, Pontiac retains its well known Silver Streak as a basic style theme for the seventh consecutive year.

Brilliant chromium adds many highlights from radiator to rear bumper. Wide, massive, horizontal chrome radiator grills extending from headlamp to headlamp, join with fenders, bumpers and hood to give an impression of powerful beauty.

Heavy duty bumpers are built into the body. Bumper guards are spaced to form a natural built-in location for the front license plate. Ingenious new parking lamps, which are scarcely visible in the daytime, fit into horizontal spaces between the broad radiator grilles beside the headlamps.

A side view of the Torpedo-styled bodies presents improved hood and trunk lines, as well as new chromium belt mouldings, and a new treatment of fender skirts and running boards, blending into cowl and trunk. Rear fenders are protected from flying stones by rubber pads.
