THE SPIRIT OF

by JOHN CLINTON

I thought I'd seen everything, but I had a new one pulled on me yesterday. I had stopped at a gas station for some 76 when a guy rushes out the door with an orange paper in his hand and attacks my windshield.

Now I find my windshield, and I like to look through it, and I don't like liberties taken with it. "Hey," I said in a controlled scream, "What's cookin'?"

And the Union Minute Man (high class language for the guys who run Union stations) told me that it was a new kind of windshield service.

It seems that Union engineers have figured out a way to get windshields really clean, free of fuzz, dirt and those mysterious streaks that only show up after you've driven away with what you thought was a clean windshield.

They call it Minute Man Windshield Service, and it means that they take one of these patented orange-colored towels, especially made and chemically treated, and after spraying the glass with Union's new Glass Cleaner, they go after it with one of these towels!

The result is a streakless, film-free windshield that's crystal clear—and that, in wet weather, sheds the little drops of water that obscure your vision.

Stop in at a Union service station and have us give your windshield a treatment. It's free, and something you've never had before.

Silverton Mayor Returns With Deer; Women Prove Nimrods Equal of Men

Went on Hunt for Deer; Women Prove Nimrods Equal of Men

SILVERTON—While the mayor's party was expected back to Silverton from its eastern Oregon hunting trip earlier in the week, it did not show up until late Saturday night. O. H. G. Silverton groups returned, reporting 'luck.' But Mayor Zetta Schlador and the five other members of her party continued to remain away. When they did return late Saturday night, members of the party reported, it was all the mayor's fault. She had all the characteristics of the Canadian Mounted police. She would not return without her deer and it was not until Thursday that she managed to get her deer, when she brought down a four-point buck, shot through the heart. Hunting of the party continued through Friday and the result was that each member of the party brought back a buck. Mayor Schlador reports that it was very cold in the hills where they hunted above Burns and that the thermometer hovered between 20 and 30 degrees. Also, she says, the thunderstorm which hit Silverton Thursday afternoon, struck about five hours later where they were camped and proved to be the heaviest electric storm she had ever witnessed. In the group were Mayor Schlador, Mr. and Mrs. Lee Inman and Mrs. and Mrs. Norris Ames. This group has hunted together for a number of years and the men boast that their wives are as good shots as they are.

HOW TO AVOID WAR

Aggressor nations attack only when they think they can win. Here are some facts that should discourage such ambitions toward the United States

The same bomber can fly 30% faster and farther in the United States than in Europe. It can carry 20% to 30% more bombs; it can climb above anti-aircraft fire 25% quicker and its engines will last almost twice as long.

A bomb as big as the Washington Monument could never get to these natural storage tanks, completely protected by a mile or more of earth.

An Army Marches on a "Steel" Stomach

It used to be said that "an army marches on its stomach," but today, it marches on a steel tank...filled with gasoline!

During World War I it took about 4,000 horsepower to run a division, but today it takes 187,000...for tanks, trucks, motorcycles, guns, and cannon.

No other country in the world can even begin to support such a mechanized force on its domestic production of petroleum. But the United States can, because we have over half the proved oil reserves of the world.

The Pacific Coast by itself can supply the Navy—even a two-ocean Navy—with all the fuel oil, diesel oil and highly specialized greases it will ever need.

Incidentally, many of the 60 tankers which the industry operates on the Pacific Coast have been built to U. S. Navy specifications, are speedy enough to keep up with the Fleet. Tankers and their trained Naval Reserve crews are ready for enlistment, when called.

A report to the public on the Pacific Coast Petroleum Industry

Three-quarters of a million people in all parts of the Pacific Coast depend for their living on this industry's oil wells, refineries, equipment, transportation, and service stations.
