Mt. Angel Civic Club Hears Hausler On National Finance at Tuesday Meet

MT. ANGEL—Quoting from Montana's Representative Thorkelson in the Congressional Record on "Gold and its Power," Joseph Hausler, president of the Civic club told the members, at the city hall Tuesday night, that "The power of gold is greatest when nations are in debt."

Explaining the complicated labyrinth surrounding national finance, Hausler showed how the lowering and raising of the price of gold filled the money bags of the internationalist while it robbed our own people of their homes, farms and savings.

He defined the internationalist as the man who looks out merely for himself, caring not whether disaster overtake his own or any other country just so long as the misfortune brings in dollars to him.

In the absence of the president and vice president, Mrs. Webb Lewis presided.

The chief business was to change the name of the club from Oak Grove Ladies' Aid to Oak Grove Woman's club.

"I DID A LITTLE SLEUTHING"

...and found out how they're able to sell this grand fresh coffee for so little. It's the thrifty bag...and fast roaster-to-grocer delivery!

Here's the biggest selling coffee in my store! I could hear my grocer saying "It's not only choice coffee... smooth and mellow rich... but its price is surprisingly low. And here's why..."

Order Airway so often, get it so quickly from nearby grocers, that a fancy package is not needed. Airway's sensible bag saves you many a penny... and still you're always certain of freshness!

Frankly impressed, I bought a pound. "What's more," he told me, "Airway's ground to your order. That means peak goodness. To prove it, try this pound on the roaster's guarantee. Unless you like everything about Airway... it costs you nothing!"

Don't Be Put Behind the PUD 8-Ball

Why Gamble with these 8 PUD Risks?

- 1 Creation of a New Tax-Laying Body.** The PUD measure to be voted on November 5 would set up a new tax-levying agency with broad powers to levy taxes without your vote, to spend your tax money for practically any purpose that suits the commissioners' fancy—even for electioneering future PUD bond issues. (According to the state Hydro-Electric Commission, an estimated \$3,232,260 in bonds will be required for the purchase of an electric system).
- 2 \$79,380 New Taxes Every Year for Five Years.** The ballot measure authorizes the PUD commissioners to levy taxes immediately—without your further vote—amounting to 2 mills each year for five years. This means a total of \$396,900 based on present property valuations.
- 3 Unlimited Amounts of "Revenue" Bonds.** The PUD commissioners can spend their annual tax income to electioneer for the voting of any amount of so-called revenue bonds. These bonds would be liens against your electric bills. If the scheme goes sour, your electric bills could be raised to bail out the bondholders.
- 4 \$3,969,041 of General Obligation Bonds; Liens on Your Home.** The PUD commissioners could, under the law, use their taxing power to build up a war chest to electioneer for general obligation bonds up to \$3,969,041. These would be liens against your property. AGAIN, if the scheme goes sour, your taxes could be increased to bail out the bondholders.
- 5 PUD Bondholders Could Force Up Your Rates.** The State of Oregon now regulates electric rates in the interests of the public. But if the PUD is foisted on the people, then you lose this protection. Instead, PUD revenue bondholders will become the electric-rate dictators. Under the law, they can force up your electric rates to pay every dollar of principal and interest on the PUD bonds.
- 6 Loss of \$123,163 Taxes Now Paid by Power Companies.** The present power companies in Marion county paid \$123,163 into the public treasury in 1939, upon their operations within boundaries of the proposed PUD. The attorney-general has cast doubt on the ability of the tax-collector to force payment of taxes by Oregon PUDs. A PUD may leave you and other taxpayers holding the bag—

having to make up, out of your own pocket, the \$123,163 now turned into the public treasury by the power companies for the support of your schools, roads, old age assistance, relief, national defense, and all other functions of government.

- 7 Mismanagement by PUD Promoters.** Up to the beginning of this year, the PUDs in Washington State had squeezed from the suffering public \$903,604 in taxes. Where has this treasure gone? To make preliminary surveys, for attorney fees, for engineering fees, for court costs, etc., etc. Many of these PUDs have not as yet sold as much as a nickel's worth of electricity to anybody. The chief beneficiaries have been the PUD promoters themselves.
- 8 The Biggest Risk of all: Higher Electric Rates.** The PUD promoters talk glibly about "lower electric rates" in an attempt to put over their scheme. What are the facts? We show in the chart below the rates of two PUDs now distributing Bonneville power at Bonneville rates—the only PUDs hooked up to Bonneville Dam and offering rates approved by the Bonneville Administrator. Also we show the amounts PGE residential customers pay for electricity. See how much MORE PUDs charge for Bonneville power than PGE.

AND—these PUDs are richly subsidized by the taxpayers... while PGE brings you Bonneville power at low rates, WITHOUT A SINGLE PENNY OF TAX SUBSIDY.
