Crisco—and only Crisco—gives 3 new exclusive cake advantages

Are you completely happy about the cakes you make? Do they come out light and fine-textured? So delicious the folks enjoy every crumb? Well, that's the wonderful kind of cake you can make with New "Sure-Mix" Crisco—as hundreds of women discovered who tested Crisco against other well-known household shortenings.

Families vote 4 to 1 for Crisco cakes. Here's how the cake-test was made. Independent investigations called at random on women all over the country. These women were using other well-known shortenings including the most expensive kind. They were given New "Sure-Mix" Crisco and asked to bake cakes with their own recipes—then compare! Here's what happened...

vote was 4 to 1 for Crisco cakes against those made with all other shortenings. Yes, when those women reported their choice, four times as many said their Crisco cakes were lighter... had a smoother texture... their families said they tested were delicious!

And the vote was 4 to 1 for Crisco for flakier pastry—better-tasting fried foods, too.

Why Crisco is different. "Sure-Mix" Crisco is the only home shortening we know of which has a patented discovery—a secret of combining with other ingredients. Crisco batters are smoother, can give cakes up to 15% lighter and fluffier (depending on type of cake).
