

Wheat Rallies Despite War

Buying From Mills, Covering of Sales Aids in Recovery

CHICAGO, April 9—(AP)—The wheat market displayed strong rallying power today in the face of depressing news from the Balkan war front.

Early losses of as much as 1 1/2 cents carried May futures to 89 and July to 87 1/2, lowest since March 28, and extended the market's retreat from the 10-month peaks established last week to 4 1/2 to 5 1/2 cents.

At this point, however, selling diminished and fresh buying attributed to mills and other interests as well as professional traders covering previous short sales stimulated a recovery that wiped out practically all of the loss.

Wheat closed 1/4 lower to 1/4 higher compared with yesterday, May 90 3/4-1/4, July 88 1/2-1/2.

Traders were disturbed by war news and the Churchill speech but there was no large scale selling.

Reports that the recent price drop checked redemption of loan grain, with prices in most localities now out of line for profitable sales, had a strengthening effect and market experts pointed out that the trade must not lose sight of price supporting policies likely to be adopted by the government for the 1941-42 season.

There were reports that substantial quantities of wheat already had been turned over to the government in default of loans. All warehouse stored grain loans will fall due by the end of the month.

Plant Exchange Club Feature

SWEGLA—Last Tuesday the Swegle Ladies' club met at the home of Mrs. George Brown with Mrs. Ella Brown assisting hostess. The president, Mrs. William Hartley, presided. The lesson was on identifying Oregon wild flowers and an exchange of plants from home gardens was made. Fourteen members and two guests were present.

Miss Maxine LaDue, bride-elect of Clayton C. Gibb, has been honored with three special fetes, a bathroom, kitchen and crystal shower. The wedding will take place this week.

Spring Cleanup Started at Park

SILVERTON—The spring clean-up program is well under way in the city park under the direction of John Watson, caretaker.

John W. Jordan and Al Coote, the city council park committee, were so satisfied with Mr. Watson's work of a year ago that he was retained for an occasional day throughout the winter.

The heavy park season will not begin until some time in May.

WOOL IN BOSTON

BOSTON, April 9—(AP)—(USDA)—The bulk of the business in the Boston wool market consisted of fine or half-blood foreign wools today. Most of the purchases were for immediate needs and were closed largely on wools that had arrived. Prices for foreign wools were steady. Only a few scattered transactions were being closed on domestic wools and these sales were either on wools that had arrived in Boston or were available for immediate shipment from the country. Buying for future needs was quite restricted but prices were mostly steady.

Stocks Still On Decline

Balkan News Factor in Bringing About Further Losses

NEW YORK, April 9—(AP)—Reports of the Nazi capture of Salonika and push through Yugoslavia shook the stock market down for further losses today in the third session of decline since the Balkan blitz started.

Speculation for higher prices swung toward imported commodities, including rubber and cocoa. Strength there helped rally other staples in late dealings.

Stocks, however, exhibited little punch on rallies. War shares, evidently in a weaker technical position than most groups, gave way readily.

DuPont finished down 2 1/4 at 142 3/4. Bethlehem Steel dropped to a new 1941 low, ending at 73 3/4, down 1 1/2, and Westinghouse lost 1 1/2 at 91 1/2. US Steel finished off a point at 52 1/2 after making a new bottom for the year.

Off fractions to more than a point were Union Carbide, Standard Oil of New Jersey, Texas Corp., J. C. Penney, Owens Illinois Glass, Douglas Aircraft, Anaconda, General Motors, Santa Fe, New York Central, American Can and Sears Roebuck. Youngstown Sheet and Great Northern Preferred were among the few emerging with slight gains.

The Associated Press composite price of 60 stocks was off 5 of a point at 40.5. Aluminum of America dropped nearly 6 to about 136 in the curb list.

Resin Spreader Best For Mildew Control

A resin potash spreader is being given the top recommendation for use in the sprays for hop downy mildew control by G. R. Hoerner, federal specialist stationed at Oregon State college. Of all spreaders tested in the past 10 years, it has been found the most satisfactory material considering effectiveness, availability and cost. Directions for mak-

Season for "Sunworshippers" Approaches

UNIVERSAL ADVENT of the sunworshiper's season—the time of the open road—is marked by the introduction of the open, or convertible top automobiles by the automobile industry. Latest announcement of a sport car of this type comes from Nash Motors, Division of Nash-Kelvinator corporation, which is placing two convertibles on the market. This picture of one of the new Nash cars was made at the Universal lot and shows Anne Nagel, Universal starlet, posing in a salute to summertime.

Berry Spray Needed now

According to Robert E. Rieder Acting county agent, the gooseberry fly is now emerging in cages set up in gooseberry fields in the two localities of Marion county.

The first spray application for the control of this pest should be applied not later than April 16 to April 19.

Gooseberry flies, after emerging from the soil, usually take a period of about a week or 10 days in which to mate and begin laying eggs. The gooseberry fly lays its eggs under the skin of the developing gooseberry and after this happens the spray application is not effective.

This spray should be done with the following formula: lead arsenate, 2 ounces; cheap molasses, one quart; water to make three gallons.

The spraying should be applied thoroughly to both the upper and the under surfaces of all the foliage, particularly the lower parts of the plant which are most frequented by the fly. Sprays should be repeated at 10-day intervals until harvest time and reapplied after heavy rains.

Mr. Rieder states that the first spray is very important in the control of gooseberry maggot because it is the early egg laying which, if not prevented, causes the large worms in the berry at harvest time.
