Orders Inspired by Army Buying, Loans on New Crops

CHICAGO, April 14-(AP)-Wheat prices shot up as much as 11/2 cent at the opening gong, later retreated for net losses of about 1/2 cent at one time and then came to life again in final dealings, equaling or bettering the early highs.

An advance of three cents in soy beans futures to above \$1.21 for May delivery, highest since January, 1940, attracted attention. Traders attributed the opening

run-up of wheat to accumulated orders inspired partly by late last week's increased milling demand, which may have been associated with army buying, and by prospects of congressional action under which loans on the new crop would be increased. The late rally followed reports that the army was preparing to make awards on purchases of vitamin enriched

Wheat closed at the best level of the day, 78-11/2 higher than Saturday and within about one cent of the ten months peaks established ten days ago. May was quoted at 92% and July 91%-1/2.

Balkan News Offset by Developments in Home Labor Field

NEW YORK, April 14-(AP)-Stocks rallied irregularly in today's market when favorable labor developments at home helped offset cloudier foreign news. Leaders dipped fractions to

more than a point in the forenoon, many to new lows for the year, as the British position in the Balkans seemed to be growing shakier.

Prices began to come back when steel companies announced a pay raise to employes.

The Associated Press average of 60 stocks ended with a net gain of .1 of a point at 40.2, the first upturn in this composite since April 3.

Transfers of 458,700 shares compared with 357,230 last Thursday and was expanded to this total by a last-minute sale of 75,000 shares of Commonwealth (Buying Prices) & Southern at 38, off 1/16.

Wool in Boston

	BOSTON, April 14—(AP)—(USDA)—
4	Very little new business was transacted
	in the Boston wool market today. Few mills were showing any interest in

Making America Strong CHROMIUM

Practically all chromite chromium ore is imported into the US, and above chart shows from where it is obtained. Principal use of chomium is as an alloy in steel, therefore a strategic metal in the defense program. Domestic attention is being turned to deposits in the three Pacific coast states, especially southern Oregon, and research is again directed toward the production of the best possible product from low grade domestic ores.
