Wheat Shows Cent Loss

Lack of Progress in Farm Legislation **Lowers Futures**

CHICAGO, April 22-(AP)-Continued pessimistic war news plus weakness of stocks and surrounding commodities were too much of a handicap for the wheat futures market Tuesday and prices lost almost a cent after a higher opening.

A warning that the government would resist unwarranted lard price increases, failure of expected flour buying for the Red Cross to materialize and lack of progress in farm legislation also were depressing factors. Enlarged offers of wheat in the face of light demand uncovered some stop loss selling. Short covering just before the close raised prices fractionally above the day's lowest levels.

Wheat finished %-% cent lower than the previous close, May 891/2-5%, July 873/4-5%.

Trade estimates placed the amount of loan wheat to be defaulted at around 250,000,000 bushels by the end of the month when the last of the loans come due. Price setbacks since the nazi campaign in the Balkans started have lowered the value of wheat to a point where it was no longer profitable to redeem and liquidate loan stocks.

SHELBURN-Most of the farmers in this section have completed their spring seeding. This is early for the seeding to be completed, but the weather has been very favorable for field work. The crops sown last fall are in general above average. A number of fields have had to be eaten off by sheep to re-

tard the growth. Berry growers have been visited by buyers offering five cents per pound for strawberries and nine cents for black caps. The cherry crop in this section has been hard hit by frost and hail storms.

By Quinn Hall Deadline Set For Growers

Certification Slips Must Be Returned to Agent by May 1

Strawberry growers who intend o enter plants for certification this year must get their applications from the county agent's office and have them completely filled out and returned by May 1. After that date they will not be accepted, according to Acting County Agent Robert E. Rieder.

Rules and regulations for 1941 are almost similar to those of former years. One change requires that fields entered for certification must be from Oregon Blue Tag planting stock certified in 1940. It states further that fractional parts of fields cannot be entered for certification but only whole fields which are not immediately to uncertified plantings.

The fee for tagging 1941 certified plants has been increased to 5c per tag rather than 1c as before. The fees for this year's certification are the same, namely \$7 for the first acre or less and \$3 for each additional acre or fraction thereof. Half of the total fee must accompany the appli-

Seriousness of Onion Disease Is Stressed

Onion growers who wish to get more information about the yellow dwarf disease, which has recently made its appearance in Marion c inty on onions grown for seed and bulbs, should get in touch with Acting County Agent Robert E. Rieder before Saturday, April 26.

On that day he and Dr. F. P. McWhorter of Oregon State college will visit as many individual
